

# Announcements for Feb. 20th, 2020

## Important notice to all Grade 11 Students

Course programming Sheets for **Grade 12 - Graduating Class of 2021** are now overdue. We are missing 115 out of 275 students. You will not be able to participate in any course entry sessions unless a sheet has been pre-approved by Mrs. Weyell. A list has been posted outside of the Counselling office. Snooze you lose. Hoping to Graduate next year? **GIDDY UP!**

Any students between the ages of 15-17 that are interested in participating in a 3 week Leadership Exchange Program in the United States that focuses on civic engagement and entrepreneurship please see Mrs. Weyell for more info.

The Library's 3 Contests will continue until the end of the month. There's still time to enter and win great prizes!

This Friday the Library will be closed at Lunch to accommodate the "Lunch with a Scientist Event". Thank you for your understanding.

Hey Carson! For this week's Lunch with a Scientist, we will have a presentation by Dr. Anne-Marie Nicol who is a professor at SFU in the area of human health with a PhD from UBC's Faculty of Medicine. Don't miss out on this amazing opportunity by coming to the library this Friday at lunch to hear this presentation!

This past weekend, members of the Carson Graham Model United Nations Club participated in a mock UN conference downtown that ran from Friday to Sunday. Throughout the three very busy days Carson students worked among 1500 others from across North America in committees whose topics ranged from damage caused by war on world heritage sites to the possibility of weaponizing space. Each student researched and represented assigned countries and debated, negotiated and proposed solutions to these controversial topics. In the end, Carson Graham was represented well in the awards category where grade 11 students Ana Bandari, Aaliyah Mahboubi, and Camille Mantilla all won for research. Congratulations to everyone who participated in a fun-filled but also exhausting weekend of diplomacy!

Interested in performing with Carson's Chamber Choirs? Come on out next Tuesday at lunch in the music room for some information about auditions. No experience necessary!

Did you know that every SECOND, the US's factory MEAT farms create roughly 89,000 pounds of waste? This waste contains highly concentrated chemical and bacterial toxins and is not treated at all. Think about how choosing one day of meatless meals, or even one meatless meal, can help our planet. If you want more information, want to be rewarded with raffle tickets to the aquarium if you have a meatless lunch, or want to

help input new meatless options in the cafeteria, come to the Environmental Club's meatless Monday booth on Mondays in the agora.

Any students in Grades 10 - 12 interested in attending Medical School?

UBC is hosting a **Operation Medical School Conference 2020** - March 8th - Full Day

See Mrs. Weyell for more info and registration information, hurry deadline is March 6th
