

Building Healthy and Resilient Communities

SD44 Board Standing Committee
October 4th, 2022

Guiding Questions

- More and more open conversations about mental health and well-being are happening. Why is this important and how can we support these conversations?
- Is there community-based stigma to talking about mental health or mental illness? What does that look like/sound like? Who is most impacted?
- How has COVID-19 impacted child, youth and community mental health?
- What role should schools and school communities play regarding mental health and well-being?
- Five to 10 years from now, what do conversations about, and structures connected to, mental health and well-being look like/sound like, in schools and in our communities?

Promotion of Positive Child and Youth Mental Health

Mental health in North Vancouver during COVID-19

- **59%** report that their mental health has worsened
- **63%** report that their child's wellbeing is worse
- **81%** report that their child is more stressed

Vancouver
Coastal Health

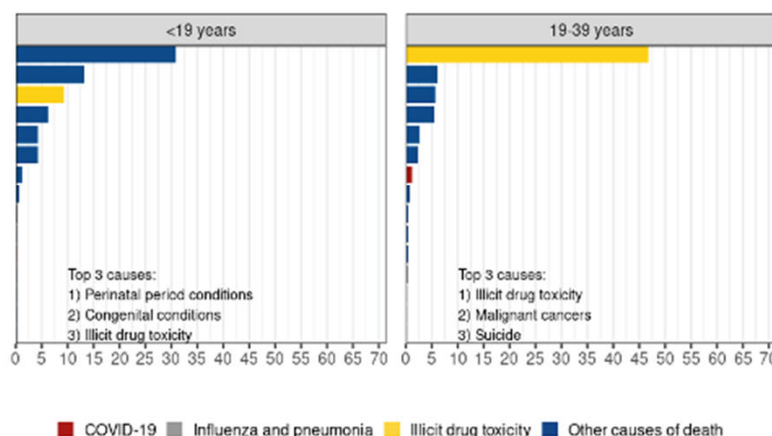

4

In North Vancouver, factors that are protective for our mental health have suffered during the pandemic

- **67%** report that their child has decreased connection with family
- **93%** report that their child has decreased connection with friends
- **44%** report increased household conflict
- **73%** report that their child is less physically active
- **93%** report that their child has more screen time
- **13%** report that their child's diet is worse (fewer fruits and vegetables)
- **35%** report that their child is sleeping less
- **92%** report that their child is participating in fewer extracurricular activities

Trajectories (CHART) Lab

STATE OF YOUTH MH IN CANADA PRE-PANDEMIC

- ~1.2 million diagnosed with mental disorder; < 20% receive appropriate treatment¹
- In 2012 national mental health survey, mood and substance use disorders were highest among 15-24 year-olds²
- Increasing trends of poor/fair perceived mental health and diagnosed mood/anxiety disorders among 12-24 years-olds³

Over the past decade, 60% increase in mental health-related hospitalizations

Source: Canadian Institute for Health Information

SIGNIFICANCE OF YOUTH

- 70% of Canadians living with mental illness have onset of symptoms **before the age of 18**¹
- Adolescence is a **developmental transition period** between childhood and early adulthood involving the navigation of new physical, hormonal, cognitive, emotional changes as well as social challenges⁵
- Potential for increased life satisfaction coupled with onset and escalation of psychopathology⁶
- This period presents a critical time for mental illness **prevention and promotion** of mental health and well-being^{6,7}

YDI Dimensions and Domains

Cross Cutting Domains

- Resilience
- Positive Childhood Experiences
- Thriving
- Positive Mental Health
- COVID-19 (YDI 2021)

WAVE 1 DATA ANALYSIS

Individual & Contextual Factors

Individual

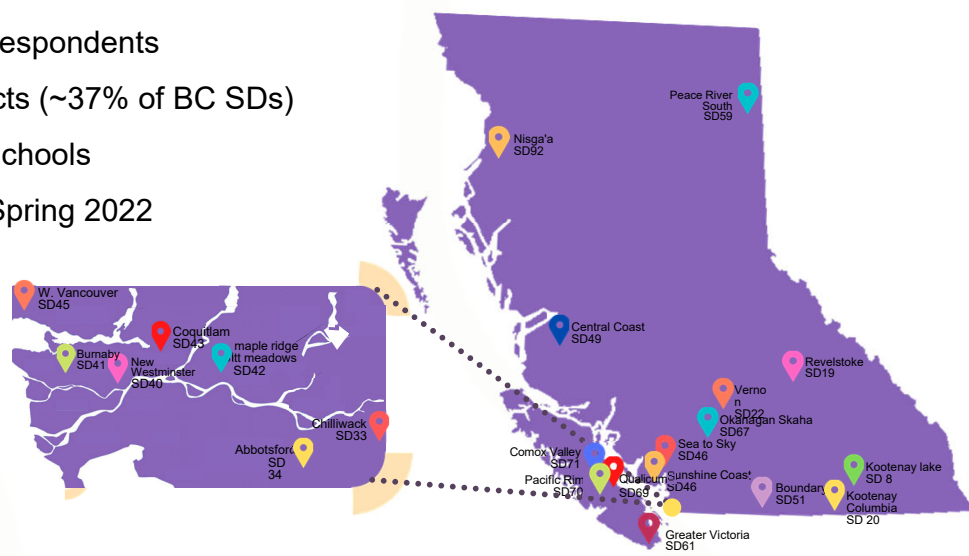

- Female/non-binary gender
- 2SLGBTQIA+ status
- Existing MH condition

Contextual

- Loneliness
- School pressure
- Good sleep

Wave 2 Participating Districts

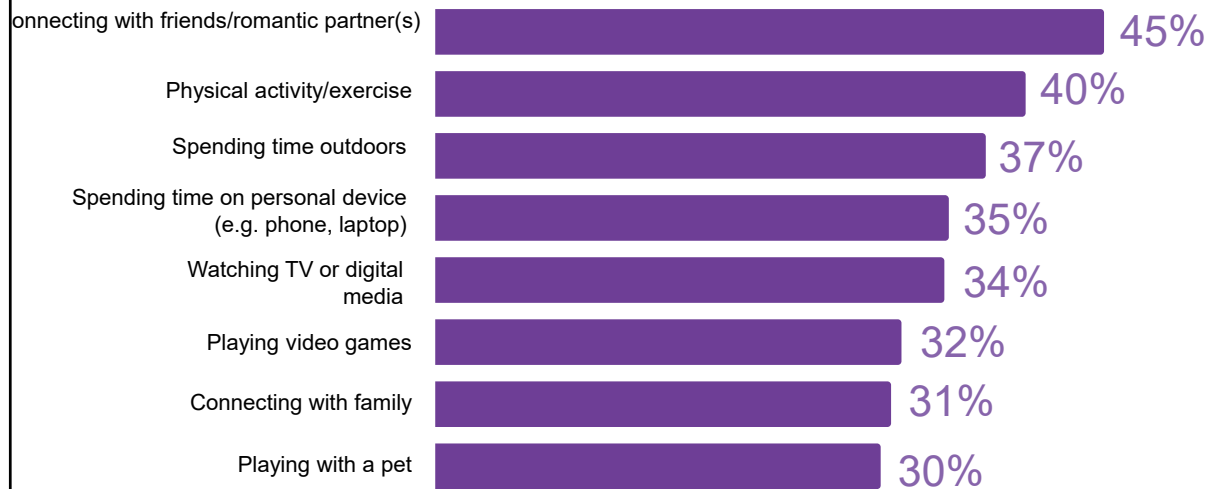

- ~9,000 student respondents
- 22 School Districts (~37% of BC SDs)
- 5 Independent Schools
- Data collection Spring 2022

Coping Strategies

YDI Youth Development Instrument

*Participants could select all that apply

n=~8,175

People at my school talk openly about mental health.

Mental health is an important issue for people my age.

My school encourages students to take care of their mental health.

Perceptions about MH in Schools

 Assistant Professor | Faculty of Health Sciences,
 SFU

COVID & KIDS PROJECT

How can we best support youth mental health through the pandemic recovery phase?

- Analyze data from two provincial surveys (YDI & PICS)
- Bring together youth mental health partners
- Identify disproportionately impacted sub-populations
- Inform efforts to promote resiliency and support mental health & well-being

RECOMMENDATION DEVELOPMENT

TAKE PRIORITY ACTIONS TO ADDRESS MENTAL HEALTH DISPARITIES AMONG UNDERSERVED POPULATIONS

- Certain sub-groups of youth have been disproportionately impacted by the COVID-19 pandemic
- Girls, non-binary, 2SLGBTQIA+ youth, youth with a prior MH condition, youth from low-income households, racialized youth, & Indigenous youth, have reported poorer MH outcomes.

SCHOOLS CAN PROVIDE TARGETED MHW SUPPORTS FOR UNDERSERVED STUDENTS

IMPROVE YOUTH'S KNOWLEDGE OF AND CONNECTION TO MH RESOURCES

- ▶ Develop a repository of youth mental health and well-being resources
- ▶ Address youth's knowledge gaps about mental health and the resources available to them

SCHOOLS CAN ENSURE INCLUSION OF RESOURCES FOR DIVERSE YOUTH

INCREASE YOUTH REPRESENTATION AND INCLUSION IN YOUTH MH RESEARCH, PROGRAM DEVELOPMENT, AND EVALUATION

- ▶ The inclusion of youth voices is important for decision-making across sectors for decision-making
- ▶ As outlined by the United Nations Convention on the Rights of the Child (Articles 12 & 13) there is an obligation to hear, respect, and value youth voices

SCHOOLS CAN DEVELOP CLEAR STRATEGIES TO INVOLVE YOUTH THROUGHOUT THE DEVELOPMENT OF INITIATIVES THAT PROMOTE ACTIVE ENGAGEMENT AND AVOID TOKENISM

EXPAND EXISTING MH PROGRAMS AND INTERVENTIONS PROVEN TO BE EFFECTIVE AT IMPROVING YOUTH MH

- ▶ Many evidence-based preventative interventions are not yet systematically implemented in BC.
- ▶ Finding evidence-based programs for youth MH is highly decentralized.

WE ARE CREATING AN ONLINE
REPOSITORY OF EVALUATED
STRATEGIES AND INTERVENTIONS FOR
SCHOOLS.

ENHANCE OR STRENGTHEN SOCIAL AND EMOTIONAL LEARNING (SEL) STRATEGIES WITHIN SCHOOL CURRICULA AND COMMUNITY PROGRAMMING TO INCREASE RESILIENCE AND POSITIVE MENTAL HEALTH.

- ▶ SEL resources and MH literacy may differ widely across districts and between schools
- ▶ Enhancing SEL strategies can improve learning experiences for all students across BC.

INCREASE INCORPORATION OF SEL AND MH
LITERACY INTO SCHOOL CURRICULA

REFRAMING EXTRACURRICULARS AS CENTRAL TO YOUTH, FAMILY, AND COMMUNITY WELL-BEING

- ▶ Extracurricular activity is often considered supplementary and subject to inequitable access
- ▶ Family access, living in urban areas, and gender are associated with differences in participation of extracurricular activities

E.G., FREE COMMUNITY-CENTRE ANNUAL PASSES FOR YOUTH

INCORPORATE MORE TIME OUTDOORS INTO SCHOOL CURRICULUMS

- ▶ Outdoor learning has been found to improve youth's health in the scientific literature (Oberle et al., 2019)
- ▶ Also meets calls to increase outdoor learning to curb COVID-19 spread in indoor spaces

INCORPORATE INDIGENOUS LAND-BASED ACTIVITIES AND EXPERIENTIAL LEARNING IN SCHOOLS

SUPPORT AND INCREASE MH KNOWLEDGE AND KNOWLEDGE HOLDERS

- ▶ Reported unmet mental health needs illustrate demand for more MH knowledge holders in the community
- ▶ Knowledge holders can increase service accessibility fill support gaps, and reduce mental health stigma.

SCHOOLS CAN IMPLEMENT PEER-TO-PEER MENTAL HEALTH AND WELL-BEING PROGRAMS

Thank you!

Well-Being: An Everyone Endeavour

SD44 Standing Committee

October 4, 2022

Jeremy Church – District Principal of Safe and Health Schools

Sakhiwewin

"How do I weave love into my actions?"

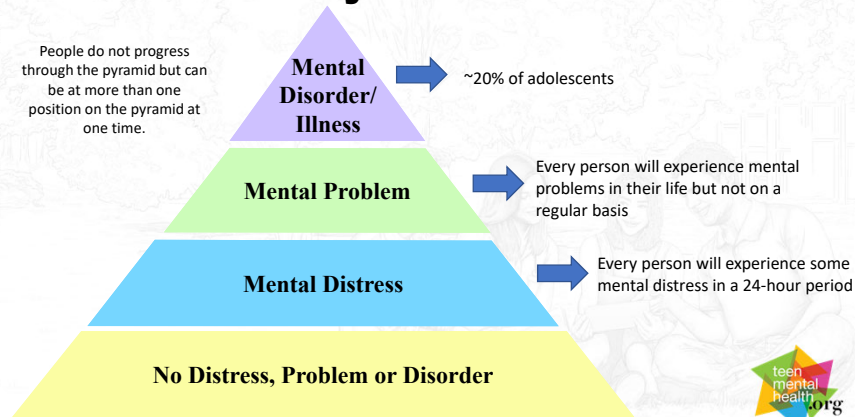

What is Mental Health?

- The capacity to successfully adapt to life's circumstances. It does not mean happiness nor does it mean not having negative feelings, worries or difficulties. It includes the experience of stress and the use of that experience to help you solve the many and frequent challenges of life. People develop that capacity in the context of human relationships and usual developmental processes.

Mental Health Pyramid

People do not progress through the pyramid but can be at more than one position on the pyramid at one time.

Supporting Personal, Social,
and Emotional Well-Being

In order to support others,
educators (all adults in the
education setting) must support
themselves.

But ...

OPINION

Put down the self-help books. Resilience is not a DIY endeavour

MICHAEL UNGAR

CONTRIBUTED TO THE GLOBE AND MAIL

There is no power for change
greater than a community
discovering what it cares about.

Advocacy

1. Youth Development Instrument
Youth Advisory Council

1. **Real Talks**

Personal

What is Real Talks?

A peer support mental health program that aims to provide high school-aged youth with a safe space for conversations about mental health

- *Peers with Lived Experience* co-facilitate "talks" alongside experienced Crisis Centre facilitators
- Topics covered: the importance of self-care, reaching out for support, mindfulness tools and strategies
- Piloted at Sentinel Secondary and Sutherland Secondary

REAL TALKS

Real Talks is a peer-led mental health program at Sentinel that aims to encourage conversations about mental health. These interactive talks - co-facilitated by Peers With Lived Experience (PLEs) and Youth Educators from the Crisis Centre of BC - will cover the importance of self-care, provide specific tools, strategies, and resources for youth, and create opportunities to learn from both facilitators and peers. This is a safe place for students to learn about mental wellness.

When will the sessions take place?

- Tuesday, February 8th, X Block - 1:00-2:30pm
- Thursday, February 10th, X Block - 1:00-2:30pm
- Tuesday, February 15th, X Block - 1:00-2:30pm
- Thursday, February 17th, X Block - 1:00-2:30pm

Room 306

How do I sign up?

Join the Google Classroom and fill out the Google form! Attend all 4 sessions or just 1 (it's up to you).

The “Why?” - Addressing Mental Health Stigma

“It’s ok”

Lack of knowledge of school/community mental health resources and how to seek help

Normalizing prioritizing academics over mental well-being

Internalized shame and isolation

Associating vulnerability with weakness ✨

Creating a space for mental health conversations

Why?

- Addressing mental health stigma and creating an environment where conversations about mental well-being are normalized
- Normalizing sharing mental health struggles with peers + recognizing strength in vulnerability
- Promoting knowledge of available mental health supports among youth ✨

- Changes to daily routines – adapting to different learning models
- Isolation from peers
- Extra-curricular activities essential for well-being restricted or cancelled
- Transition from in-person to online mental health support services

Responding to the effects of COVID on youth mental health

Looking Forward... What's Next?

Expanding “Real Talks”

Schools supporting youth-organized spaces for mental health conversations

Increasing emphasis on mental health education

Youth will know how to access support

Real Talks - Youth Program Inquiry

These Talks aim to engage high school youth in discussions about mental health and wellness in a safe and structured environment over four 1.5-hour sessions, each co-facilitated by the Crisis Centre's Youth Educator and Peer Leaders with Experience.

This series is organized in partnership with schools. Participation of student peer-leaders and school counsellor/ teacher is required.

Limited number of Real Talks is **available at no cost** to Vancouver and the North Shore schools.

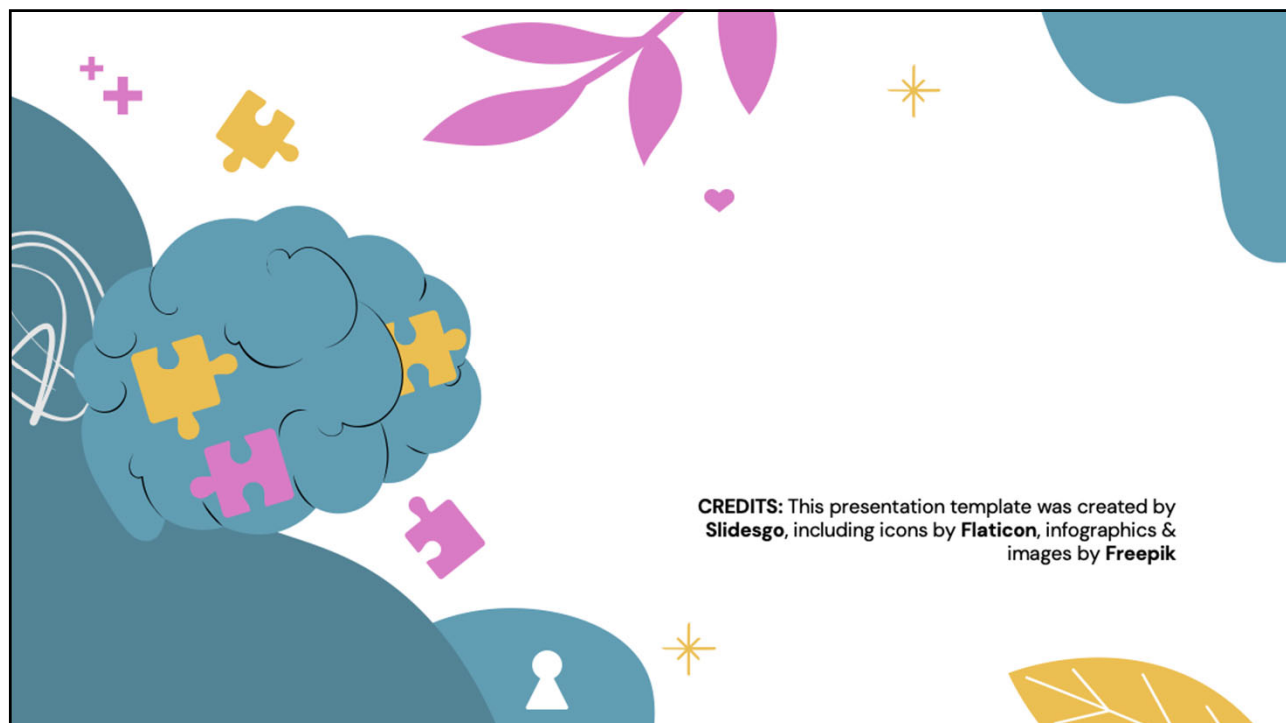

To request Real Talks at your school or for more information, please submit your details below:

Panel Discussion

October 4th Standing Committee Meeting

Table Talks

- What did you hear during the panel presentations that resonates with you/your table?
- What questions remain yet to be addressed or answered?
- Table facilitator will capture notes on page
- Table groups will be invited to share 1 resonance and/or 1 question
- 15-20 minutes

Guiding Questions

- More and more open conversations about mental health and well-being are happening. Why is this important and how can we support these conversations?
- Is there community-based stigma to talking about mental health or mental illness? What does that look like/sound like? Who is most impacted?
- How has COVID-19 impacted child, youth and community mental health?
- What role should schools and school communities play regarding mental health and well-being?
- Five to 10 years from now, what do conversations about, and structures connected to, mental health and well-being look like/sound like, in schools and in our communities?
