

## Office 365

SD44 is providing students with access and personal accounts to Microsoft's "Office 365 for Education" program.

[Office 365 Login](#)

**Office 365** is Microsoft's most recent version of their office suite, and it includes **online** and **offline** versions of Microsoft Word, Excel, PowerPoint, and more. Here are some of the reasons that students and staff can be excited about this service:

- Students can store and save up to 1TB of digital files to an online server so they can work from school, home, or any other place with an internet connection.
- Online versions of Microsoft Word, Excel, and PowerPoint can be accessed from any web browser or **students can download up to 5 copies of the Microsoft Office software and install it for free** on home computers (Mac and Windows), iPads, tablets, and Android devices. (Find it on your O365 home screen at <https://www.office.com>)

While students may not *want* to work at anytime from anywhere, SD44 is pleased to provide the opportunity.

### Login Information:

- A student will use their school login username plus the email suffix: [\\_\\_\\_\\_\\_@sd44.ca](mailto:_____@sd44.ca)
- Password is the same as the one students use at school
- Student username (email suffix) and password can be obtained from their school
