- The Sr Girls soccer team are the North Shore Champions!!! Yesterday afternoon on the Argyle field, our Sr Girls soccer team defeated Handsworth 3 - 2. Congratulations to the entire team for a terrific match and to all the grade 12s playing their final home game. The team would like to send a big shout out to all the Argyle staff and students who came to support the team.... THANK-YOU!!!!
- Starting yesterday, you might have noticed something intriguing at the bee hive — the bees are gathering in a beard-like shape at the entrance, right on the window. This is totally normal! They're getting ready for something important: swarming. That means the queen bee will soon leave the hive with about half the bees to start a new colony. If you're near the hive between 10 a.m. and 2 p.m. over the next few days, you might see a large cloud of bees flying together — it's a natural process and not dangerous. After that, the bees will cluster nearby, like on a branch or a post, while scouts go search for a new home. Please enjoy this incredible event from inside the building so we don't disturb them. It's like watching a live nature documentary, right here at school! Please don't touch the window from inside. Just let them be!
