

Puzzle of the Week

Date: _____

Worked on by: _____

Working together to solve a puzzle can be fun, not to mention helpful. To give credit where credit is due, list all the people who worked together on this puzzle. (They could be friends, classmates, and/or family members.) Please include last names and division numbers (for students).

Crossing a River - Part 2

Two adults and two kids have to cross a river. They only have one canoe. The canoe can hold one adult **or** two kids and everyone can paddle. What is the fewest number of trips it will take to get everyone across the river?
