Hey Carson, did you know you have the power to save lives? Well, you do! 800 thousand people in developing countries die each year from zinc deficiency. You can help change that by donating all your used batteries to the Zinc Saves Lives campaign this year. When a battery is donated, it is recycled, and the equivalent amount of zinc is donated to those who need it -one battery has the power to save 6 lives, you heard right! So make sure you drop off your batteries in the box in Mr Olson's engineering classroom. Thanks in advance!
