

Announcements for Feb. 21st, 2020

Important notice to all Grade 11 Students

Course programming Sheets for **Grade 12 - Graduating Class of 2021** are now overdue. We are missing 115 out of 275 students. You will not be able to participate in any course entry sessions unless a sheet has been pre-approved by Mrs. Weyell. A list has been posted outside of the Counselling office. Snooze you lose. Hoping to Graduate next year? **GIDDY UP!**

Any students between the ages of 15-17 that are interested in participating in a 3 week Leadership Exchange Program in the United States that focuses on civic engagement and entrepreneurship please see Mrs. Weyell for more info.

The Library's 3 Contests will continue until the end of the month. There's still time to enter and win great prizes!

Today the Library will be closed at Lunch to accommodate the "Lunch with a Scientist Event". Thank you for your understanding.

Interested in performing with Carson's Chamber Choirs? Come on out next Tuesday at lunch in the music room for some information about auditions. No experience necessary!

You may have heard that the livestock industry contributes around 18% of global human-induced carbon dioxide emissions, but did you know that it also contributes 65% of global human-induced nitrous oxide emissions? Just like carbon dioxide, nitrous oxide is a major greenhouse gas. Think about how choosing one day of meatless meals, or even one meatless meal, can help our planet. If you want more information, want to be rewarded with raffle tickets to the aquarium if you have a meatless lunch, or want to help input new meatless options in the cafeteria, come to the Environmental Club's meatless Monday booth on Mondays in the agora.

Hey Carson! Today's lunch with a Scientist, will be a presentation by Dr. Anne-Marie Nicol who is a professor at SFU in the area of human health with a PhD from UBC's Faculty of Medicine. Don't miss out on this amazing opportunity by coming to the library today at lunch to hear this presentation!
