

Handsworth Secondary Course Information

Course Selection

ORANGE SHIRT DAY

Handsworth students and staff join the hundreds of thousands of other Canadian in wearing orange in honouring the children who survived the Indian Residential Schools and remembering those that didn't.

If you are unfamiliar with the story or origins of Orange Shirt Day, here is the story behind orange shirt day..

"I went to the Mission for one year. I had just turned 6 years old. We never had very much money, and there was no welfare, but somehow my granny managed to buy me a new outfit to go to the Mission School in. I remember going to Robinson's store and picking out a shiny orange shirt. It had eyelets and lace, and I felt so pretty in that shirt and excited to be going to school! Of course, when I got to the Mission, they stripped me, and took away my clothes, including the orange shirt. I never saw it again, except on other kids. I didn't understand why they wouldn't give it back to me, it was mine! Since then the colour orange has always reminded me of that and how my feelings didn't matter, how no one cared and how I felt like I was worth nothing. I finally get it, that the feeling of worthlessness and insignificance, ingrained in me from my first day at the mission, affected the way I lived my life for many years...I want my orange shirt back!"

The course offerings in the high school years are designed to develop a sound foundation in the core subject areas and at the same time, provide opportunities to explore other areas of interest. When selecting electives in Grades 8, 9, and 10, parents and students are encouraged to consider courses in a variety of subject areas. Although the Senior Secondary School years provide the opportunity of greater specialization, parents and students should be guided by the belief that a broad liberal education provides better preparation for further education and the future.

Considerable time and effort go into the development of the school schedule; it is important to understand that the schedule is based upon student course selections. It is important that parents and students give careful thought to the process of course selection.

To the best of our knowledge these courses are the course offerings for the 2019/2020 school year. These offerings are subject to changes based on funding, staffing, student demand, expertise of staff and school district and Ministry guidelines.

Once selections have been made, it is expected students will abide by their choices. Final course offerings are dependent on staffing and student demand.

STUDENT COURSE LOADS

We strongly encourage students to take 8 courses in every grade throughout their high school career.

- Some students in grades 8, 9 and 10 may take more than 8 courses. E.g. Music and Distributed Learning.
- Students in Grade 11 & 12 may apply for a study block.

There are course options that provide a more flexible approach, allowing students to retain a study block or take an extra elective within the

timetable. These courses are: Work Experience, Peer Tutoring, Jazz Band, Choir or Distributed Learning courses.

The Course Selection Booklet contains many opportunities for students in all grades to expand their horizons. We encourage students to seek out and to explore the elective options available to them.

PLAN YOUR COURSE OF STUDY CAREFULLY!

Chapter 2

Grade 8

To the future Grade 8s of Handsworth,

Hello and welcome to the start of your new chapter. We, as the Royals, are more than excited to have you join us. Handsworth offers a large selection of diverse academic courses you can choose to take. However, what makes us completely unique are the extra-curricular options we offer. Handsworth takes great pride in showcasing athletics, music, drama, fine arts, clubs, but most importantly, community involvement. No matter what you enjoy doing or learning, you can easily find something you love and people who share the same interests while you're at Handsworth.

As one of our vision statements is to be compassionate, Handsworth is filled with people who can assist and support you. Always ask for help when you need it. Whether it is the counselors, teachers, senior students, coaches, support staff, or even your friends, there will always be someone able to find a solution to your problem.

From 5 years being a Royal, I can definitely say that being involved in school has been the best choice I've made. As an avid musician, athlete, and tech enthusiast, I was able to find and join a group in school that included all three of my hobbies. These have become my best memories. I highly encourage you to do the same and engage in activities that interest and inspire you. Trust me. It won't be a mistake.

Once you step into Handsworth, your journey as a Royal will begin. Until then, stay open-minded, innovative, and ambitious. We truly look forward to having you join. Welcome to the Royals family!

Daniel Ko

Student Council President 2018-2019

Grade 8 Course Information

Handsworth Secondary is a offers an English Language and French Immersion program. Student course selections are determined by which program students participant in.

All Grade 8's in the English Program and the French Immersion are required to take these courses:

Grade 8 English Program	Grade 8 French Immersion Program
Humanities 8: English	English 8
Humanities 8: Social Studies	Sciences Humaines 8
French 8	Français Langue 8
Science 8	Sciences Naturelles 8
Mathematics 8	Mathematics 8
Physical & Health Education 8	Education Physique & Santé En Plein Air 8
Applied Design Skills and Technology	Applied Design Skills and Technology
And one of the following electives	And one of the following electives
Fine Arts 8 (Drama/Art)	Fine Arts 8 (Drama/Art)
Concert Band 8	Concert Band 8
Strings 8	Strings 8

Grade 8

Required Courses

Humanities 8 (English program)

Humanities 8 is an integrated approach to English 8 and Social Studies 8. The course includes complete coverage of both the English 8 and Social Studies 8 curricula while emphasizing common elements between the two based on human patterns and themes. Major units include the study of geography, history, and culture as well as those involving the acquisition of language arts skills through the practice of written and oral communication and the study of literature--including novels, short stories, myths, and poetry.

English 8 (French Immersion program)

English Language Arts 8 provides students with the opportunity to become effective communicators, to develop and express their own ideas, and to think deeply and critically about the ideas of others. Major units involve the acquisition of language arts skills through the practice of written and oral communication and the study of literature--including novels, short stories, myths, and poetry.

French 8

French 8 is an exciting introductory course for Core French students. It focuses on the exploration of basic French, Francophone culture, and communication skills development. Students will have access to many different resources including the Discovering French Nouveau Bleu textbook, online resources and other texts.

Sciences Humaines 8

This course focuses on how ideas and stories of different societies have shaped cultures and landscapes throughout the world. Projects aiming to link the past with the present will allow students to identify historical patterns in their everyday world. We will be doing units based in Western Europe, the Middle East, Asia and the Americas between 600 and 1750. The curriculum is developed around the following big ideas: contacts between the New and Old World, exploration, and demographic and environmental changes. Strong emphasis is placed in the first half of the year on improving reading comprehension, enriching one's vocabulary, and on developing note-taking skills.

Français Langue 8

Français Langue 8 is taught entirely in French as part of the Immersion Program. Through a variety of communicative strategies and resources, the students develop all four language skills: writing, speaking, reading and listening. The writing aspect includes narrative, informational, and argumentative texts. Emphasis is on spelling and vocabulary enrichment. The literature component is taught partly in relation to the Social Studies curriculum and explores various cultural backgrounds through the study of a novel, short stories, legends, and plays. The student will also gain confidence by participating in meaningful interactive activities, such as role plays, in-class discussions, and Concours d'Art Oratoire.

Learning Assistance 8

This course supports student organizational skills, study skills, test-taking, assignment completion, and communication with teachers. Learning Assistance supports students with Ministry designated learning difficulties. Throughout the year, students with significant academic struggles may be referred to the Learning Centre by their grade counsellor at the monthly

School Based resource Team meeting. Students bring work from their current academic subjects and are given support for their learning, as well as strategies and skills to develop as a learner.

Science 8

Science 8 is an introduction to four disciplines: Biology, Chemistry, Physics, and Earth Science. Students learn lab safety and proper equipment use. Observation and analysis are skills developed in this lab oriented course. Topics covered include processes of science, cells and systems, optics, kinetic molecular theory, atomic theory, and plate tectonics. The course includes a year long Science Fair Project.

Mathematics 8

Topics include perfect squares and cubes, square and cube roots, percents with financial literacy, proportional reasoning, operations with fractions, discrete linear relations and expressions, two-step equations, 3-D Object Geometry (Nets, surface area, volume), Pythagorean Theorem, central tendency and theoretical probabilities.

A scientific calculator is recommended but not necessary as there is an emphasis placed on developing number skills with fractions and decimals.

Sciences 8

Science 8 is an introduction to four disciplines: Biology, Chemistry, Physics, and Earth Science. Students learn lab safety and proper equipment use. Observation and analysis are skills developed in this lab oriented course. Topics covered include processes of science, cells and systems, optics, kinetic molecular theory, atomic theory, and plate tectonics.

Physical and Health Education 8

Physical and Health Education 8 is designed to develop the student's holistic understanding of health and well-being. Students in PHE 8 will

participate in different types of physical activities, sports and games. This activity based play allows students to develop knowledge, skills and the mindset to remain physically active and healthy over their lifetimes. In addition, there is an added focus on the non-physical aspects of social and mental well-being, individuality, and overall health.

Fee of \$25 for supplementary materials

Sciences et aventures en plein air 8

The Sciences et aventures en plein air is an outdoor education program that strives to develop student skills, intellect and personal growth through relevant environmental and experiential learning. The goal of the program is to provide students with opportunities to better understand our natural world and have an appreciation for various outdoor pursuits. Through the combination of Sciences and Éducation physique et santé en plein air, students will be challenged to question and seek answers to grow our collective scientific knowledge while developing the abilities to become safe, active, educated and healthy citizens throughout their lives. Students will participate in several field trips, community service, a camping trip , and some sports and activities outdoors. All grade 8 French Immersion students are welcome to apply to the program, space is limited to 24 students. A \$300 program fee will be applied to enrolled students.

Education physique & Santé en plein air 8

Physical and Health Education 8 is designed to develop the student’s holistic understanding of health and well-being. Students in PHE 8 will participate in different types of physical activities, sports and games. This activity based play allows students to develop knowledge, skills and the

mindset to remain physically active and healthy over their lifetimes. In addition, there is an added focus on the non-physical aspects of social and mental well-being, individuality, and overall health. Given the North Shore's natural setting, this course will also offer opportunities for outdoor learning experiences in a French environment.

\$25.00 for supplementary materials

Applied Design, Skills and Technology Rotation

Applied Design, Skills and Technology Rotation includes three courses that run for approximately 3 months. Students have a choice of two ADST package options.

ADST OPTION 1	ADST OPTION 2
Textiles	Robotics
Woodwork	Entrepreneurship & Marketing
Computational Thinking	Computational Thinking

Students are provided an opportunity to engage in each of these practical areas of study.

Applied Design, Skills and Technologies 8 Rotation: Robotics

Robotics 8 is one-term course offered in conjunction with a term each of Computational Thinking and Entrepreneurship and Marketing. This course focuses on uses of robotics in local contexts, including types of sensors, user and autonomous control systems, uses and applications of end effectors, movement- and sensor-based responses, program flow,

interpretation and use of schematics for assembling circuits, identification and applications of components, and various platforms for robotics programming.

Applied Design, Skills and Technologies 8 Rotation: Textiles

Textiles 8 is a one-term course offered in conjunction with a term each of Woodwork and Computational Thinking. This course examines sources of textile materials, hand and machine construction techniques for producing and/or repairing textile items, basic components of patterns and instructions, colour as an element of design, and personal factors that influence textile choices, including culture and self-expression, and the impact of those choices on individual and cultural identity.

Applied Design, Skills and Technologies 8 Rotation: Woodwork

Woodwork 8 is a one-term course offered in conjunction with a term each of Textiles and Computational Thinking. This course examines the historical and current contexts of woodworking. Students will develop the skills to identify characteristics, and properties of a variety of woods, both

manufactured and natural, and explore elements of plans and drawings, woodworking techniques, and options for reuse of wood and wood products.

Applied Design, Skills and Technologies 8 Rotation: Computational Thinking

Computational Thinking 8 is a one-term course offered in conjunction either with a term each of Textiles and Woodwork, OR a term each of Robotics and Entrepreneurship and Marketing. This course explores software programs as specific and sequential instructions with algorithms that can be reliably repeated by others, debugging algorithms and programs by breaking problems down into a series of sub-problems, and programming languages, including visual programming in relation to text-based programming and programming modular components. Students in Computational Thinking will develop foundational computer skills used throughout their high school education.

Applied Design, Skills and Technologies 8 Rotation: Entrepreneurship and Marketing

Entrepreneurship and Marketing 8 is one-term course offered in conjunction with a term each of Computational Thinking and Robotics. This course examines characteristics of entrepreneurial activity, recognition of a market need and identification of target market, development of a product or service, including its features and benefits, forms of advertising and marketing that can influence a potential customer or buyer, differences between consumer wants and needs, and the role of money management in financing an idea or developing a product.

Elective Course Options

Fine Arts 8

This elective is a semester program that includes half a year of Art and half a year of Drama.

In Art, students develop their creative skills through drawing, painting, printmaking, sculpting and design projects. Many materials are provided such as quality drawing papers and pencils, graphic pens, tempera paints, and prismacolor pencils. Students are guided to see the world from an artistic point of view and enhance their perception. They will draw from observation and are encouraged to create original designs and to use their imagination. Students are also exposed to the many career paths in today's art world.

\$20.00 is charged for supplementary art materials.

In Drama, students will participate in drama games, scene work, and dance/movement routines. In a supportive and respectful environment, students perform a wide variety of characters in front of peers in order to build their confidence and public speaking skills. The core focus of this course is engaging as a collaborative ensemble and supportive audience.

unior Blue Concert Band 8

This class is intended for Grade 8 students from the elementary band program as well as those who have previous experience on another instrument (such as piano, classical guitar, strings, etc.), but are beginners to the Band Program. In addition to scheduled large group classes, the group occasionally meets throughout the year in specialty sectionals. Students self-organize and rehearse as a small group ("chamber ensemble") during the second term. Extra-curricular rehearsals, functions and performances are common, and attendance and full participation are expected from all members. A list of uniform requirements and music supplies will be provided at the beginning of the course.

\$40.00 for supplementary materials

Junior Gold Concert Band 8/9

The Junior Gold Concert Band is intended for the advanced Grade 8 and Grade 9 Band musicians. In addition to scheduled large group classes, the group occasionally meets throughout the year in specialty sectionals. Students self-organize and rehearse as a small group ("chamber ensemble") during second term. Co-curricular rehearsals, functions and performances are common, and attendance and full participation are expected from all members. A list of uniform requirements and music supplies will be provided at the beginning of the course.

\$40.00 for supplementary materials

Orchestral Strings 8: Toccati 8

Grade 8 students have the opportunity to be part of the renowned String Orchestra at Handsworth. They continue to develop performing skills, and work together in cooperation as a group that includes the opportunity to audition for the more advanced level Concerti Strings. Instruments include the violin, viola, cello and string bass. Classical guitarists and harpists with music reading ability are welcome to join. Emphasis is placed on the enjoyment of music making with friends in a safe and caring environment. Students will be involved in continued improvement of their string instrument skills. Developing an understanding of music theory and history at an appropriate grade level is an important component leading to success in music making. Toccati 8 students typically advance to Concerti 9 in the following year.

\$20.00 for supplementary materials

Junior Gold Jazz Band 8/9

This class offers Grade 8 students (or first time jazz grade 9s) the opportunity to learn jazz. It is for students who have never played in a jazz band before. A jazz band is made up of a horn section, (saxophones, trumpets, and trombones), and a rhythm section, (guitar, piano, bass, vibraphone, drum set and percussion). The alto, tenor, and baritone saxophone players at Handsworth are typically students who play sax, flute, clarinet, or bass clarinet as their first concert band instrument. Sax players in jazz band will need to be able to "double" on flute or clarinet as they progress to the higher level ensembles. French horn players usually

play trumpet in the jazz band. Baritone horn players play trombone and tuba players play bass trombone. The rhythm section instruments can be played by any one with guitar, piano, bass, or percussion skills, or by those students wishing to develop such abilities. Jazz Band is taken concurrently with Concert Band (or Strings) each year. Students receive an introduction to improvisation. The Gold Jazz Band program includes participation in a music festival as well as a music tour. A uniform is required.

\$40.00 for supplementary materials

Choir 8 to 12

This course encompasses a wide range of repertoire including contemporary, African, American spiritual and pop music. Students will: sing harmonies, perform solos, develop their vocal technique, learn music theory, and acquire music reading skills. Students participate in live performances including choral festivals, evening concerts as well as local and international tours. This class will be scheduled outside the timetable as a 9th course. A uniform is required.

\$40.00 for supplementary materials

Lorem Ipsum dolor amet, consectetur

Curricular Areas

COURSE VIDEO

In addition to the course descriptions in this guide, videos of courses and curricular areas are available on our school [Youtube channel](#).

Section 1

French Immersion

GENERAL PROGRAM DESCRIPTION

The objectives of the French Immersion Program are to provide an opportunity for students to achieve a functional competency in the oral and written use of the French language and to familiarize students with the culture of Francophone communities in Canada and throughout the world.

Students in French Immersion must complete a total of 13 courses in French with a combination of core and optional courses. At the core of the program are Français langue from grades 8 to 12 and Sciences humaines in grades 8 to 11. Electives such as Sciences naturelles, Éducation Physique 8, Culture et communication 9 and Carrières et leadership 10 can be taken to meet the required 13 course. The addition of the Culture et Communication has provided students with further opportunities to improve their oral fluency and to understand how language and culture coexist in different Francophone communities. Upon the successful completion of 13 courses in the program and provincial exams, students will receive a French Immersion Graduation certificate in addition to the regular Dogwood Graduation Diploma.

As a bilingual school, Handsworth offers an extensive collection of French resources, which are shared with English program students. The teaching staff encourages students to participate in a number of co-curricular activities in French, thus giving them opportunities to hone their linguistic skills in more natural environments.

French Immersion Courses

Français Langue 8

Français Langue 8 is taught entirely in French as part of the Immersion Program. Through a variety of communicative strategies and resources, the students develop all four language skills: writing, speaking, reading and listening. The writing aspect includes narrative, informational, and argumentative texts. Emphasis is on spelling and vocabulary enrichment. The literature component is taught partly in relation to the Social Studies curriculum and explores various cultural backgrounds through the study of a novel, short stories, legends, and plays. The student will also gain confidence by participating in meaningful interactive activities, such as role plays, in-class discussions, and Concours d'Art Oratoire.

Français Langue 9

This course will continue to build on the skills learned in Français Langue 8. Units centered on current events, novel studies, film, fables and public

speaking will help students develop skills including synthesis and analysis, critical thinking and comparison of different points of view. As well, emphasis will be placed on writing strategies and improving vocabulary within communicative activities.

Français Langue 10

Students in this course will continue to build on the skills gained in Français Langue 9, with the goal of becoming more confident and independent writers and speakers. Units will focus on short stories, novel studies, film, poetry and theatre. Students will focus on analyzing character development, studying thematic and poetic elements, and understanding the socio-cultural-historical connection between a literary work and the author's background. Emphasis will also still be placed on writing strategies and broadening vocabulary skills.

Études de cinéma et littératures francophones 11

This Français langue 11 option is designed to encourage students to discover, explore, analyze, and interpret cinematographic and literary works of the French-speaking world. By studying a variety of texts, students will acquire knowledge of Francophone culture, which will contribute to the development of their identity. The film component of the course will enable students to discover cinematographic and literary works from different eras, cultures, styles, and genres. In addition, students will develop their ability to analyze, interpret, and reflect in order to better appreciate cinematographic and literary works from the French-speaking world. They will explore their imagination and develop their creativity, writing style, and spoken communication through multiple cinematographic and literary genres.

Communication Orale 11

In this Français langue 11 option, students will continue developing their oral language abilities through authentic communication and situations inspired by Francophone and First Peoples cultures. Students will explore Francophone culture and history through art, drama, music, and react to it through various communicative experiences including debate, and discussions. Additionally, students will refine their presentation skills by learning and applying appropriate planning and writing processes during the design stage. Students who complete this course may be eligible to participate in a District trip to France.

Français langue 12

This course is required to receive a bilingual diploma. The objective of this course is to help students to integrate and enhance the linguistic competencies and linguistic and cultural knowledge acquired during past learning experiences. Français langue 12 will enable students to gain an overview of the various factors that shape their bilingual identity. It offers many opportunities for students to deepen their knowledge of themselves and others in a changing world. In addition, students will explore different types and genres of texts, from various sources, that reflect Francophone and First Peoples perspectives. The course will encourage students to use critical and creative thinking to analyze various communication situations and refine their communication skills in diverse contexts in order to achieve their personal and career objectives.

Sciences et aventures en plein air 8

The Sciences et aventures en plein air is an outdoor education program that strives to develop student skills, intellect and personal growth through relevant environmental and experiential learning. The goal of the program is to provide students with opportunities to better understand our natural world and have an appreciation for various outdoor pursuits. Through the combination of Sciences and Éducation physique et santé en plein air, students will be challenged to question and seek answers to grow our collective scientific knowledge while developing the abilities to become safe, active, educated and healthy citizens throughout their lives. Students will participate in several field trips, community service, a camping trip, and some sports and activities outdoors. All grade 8 French Immersion students are welcome to apply to the program, space is limited to 24 students. A \$300 program fee will be applied to enrolled students.

Education physique & Santé en plein air 8

Physical and Health Education 8 is designed to develop the student's holistic understanding of health and well-being. Students in PHE 8 will participate in different types of physical activities, sports and games. This activity based play allows students to develop knowledge, skills and the mindset to remain physically active and healthy over their lifetimes. In addition, there is an added focus on the non-physical aspects of social and mental well-being,

individuality, and overall health. Given the North Shore's natural setting, this course will also offer opportunities for outdoor learning experiences in a French environment.

\$25.00 for supplementary materials

Culture et communication 9

In this course, students will develop their oral language abilities through the exploration of various art forms from the francophone world. Creative arts such as drama, dance, visual arts and music may be used to inspect perspective and varied experiences and cultures in French.

Sciences 8

Science 8 is an introduction to four disciplines: Biology, Chemistry, Physics, and Earth Science. Students learn lab safety and proper equipment use. Observation and analysis are skills developed in this lab oriented course. Topics covered include processes of science, cells and systems, optics, kinetic molecular theory, atomic theory, and plate tectonics.

Sciences 9

Science 9 continues the study of Biology, Chemistry, Physics, and Earth Science. Observation and analysis are skills developed in this lab oriented course. Topics covered include cell division and reproduction, the periodic table with elements and compounds, electricity, matter cycles, and sustainability with a focus on First People's knowledge.

Sciences 10

Science 10 extends knowledge of Biology, Chemistry, and Physics with the addition of Space Science. Observation and analysis are skills developed in this lab oriented course. Topics include genetics, diversity, chemical reactions including energy conservation and change with a focus on First People's perspectives, energy transformation during motion, local and global impacts of energy from technology, nuclear energy, and the formation of the universe.

Sciences Humaines 8

This course focuses on how ideas and stories of different societies have shaped cultures and landscapes throughout the world. Projects aiming to link the past with the present will allow students to identify historical patterns in their everyday world. We will be doing units based in Western Europe, the Middle East, Asia and the Americas between 600 and 1750. The curriculum is developed around the following big ideas: contacts between the New and Old World, exploration, and demographic and

environmental changes. Strong emphasis is placed in the first half of the year on improving reading comprehension, enriching one's vocabulary, and on developing note-taking skills.

Sciences Humaines 9

This course focuses on the movement to a democratic and industrial world in Europe and its expansion in North America between 1750 and 1919. The relationships between Indigenous people, the settlers, and the colonial government in national, regional and local contexts will also be studied. Furthermore, the examination of discriminatory policies adopted by the Canadian and provincial government will be supplemented in some years with a historical visit of Chinatown. Emphasis is placed on the development of critical reading and argumentative writing.

Sciences Humaines 10

Sciences humaines 10 will build on the skills, processes, and themes introduced and developed in earlier Sciences humaines classes to develop students as active and responsible Canadian and Global citizens. The critical thinking skills reinforced will allow for information gathering from various sources; analyzing and interpreting resources; presenting and justifying positions on issues; and informed decision making. Social Studies 10 will focus on the 20th century conflicts, events and forces that have

shaped modern Canadian politics, political systems and the modern Canada Identity. Indigenous culture and histories are also explored. Sciences humaines 10 is part of the Immersion Program and is taught entirely in French. All four skills (writing, reading, listening, and speaking) are emphasized in the strategies used.

Histoire 12

This course is offered to French Immersion students in grades 11 and 12, and provides them with a grade 12 level credit for the Humanities. Called Twentieth Century World History in English, this course covers the world wars, the rise and rule of authoritarian regimes in places such as Germany, Italy, China and the Soviet Union, and the study of the ideologies that informed them. Different human rights movements and migrations will also be examined, as well as the intervention of international organizations in different crises. The course will make extensive use of different media like documentary and narrative films, newspaper articles, statistics, maps, poetry, art, and other primary source documents to better understand divergent perspectives on events.

Carrières et leadership 10:

This course provides opportunities for students to plan for successful lifelong learning, explore factors that have an impact on future career choices and opportunities, develop financial literacy skills, and cultivate self-awareness and interpersonal skills. Further, students will develop strategies to support them in maintaining a work-life balance to encourage physical and mental health. A particular emphasis on deepening students' leadership skills will be woven throughout this course.

AP French language

This course is designed to provide an advanced course to students who are willing to accept challenges to exceed their language abilities. The course will develop the four skills of listening, speaking, writing and reading

equivalent to a college level course in French language. In the beginning of the year, students will be given the choice to either study a classical French play or create, as a group, their own original play and perform it to their peers as well as to other students from different schools. In March, students will study a classical novel. They will also be exposed to a variety of authentic materials such as textbooks, software, multimedia CD-Rom, Websites, articles from newspapers, as well as the French culture. Upon completion of French 12 AP (and after achieving a score of 4 or 5 on the AP exam), students may be granted credit at some universities (depending on each university's policies).

Optional AP Exam Fee \$150

Section 2

Dance

GENERAL PROGRAM DESCRIPTION

The Fine Arts Department is very proud of the ongoing success of the Dance Program. The dance program at Handsworth is one-of-a-kind with its strong emphasis on student choreography. Our bi-annual performances of “Hands Up”, performed by all the dancers in the program, are primarily choreographed by students for students. By following their interests and passion, our dancers have the opportunity to see their creations come to life under the tutelage of their dance teachers. This sense of ownership inspires the younger generations of dancers.

The Dance Program offers a variety of multi-grade classes, each focusing on different dance styles reflecting the dancers’ preferences, for dancers with or without previous dance experience. There is a dance class for everyone! Contemporary, jazz, lyrical, street dance and hip hop/animation/locking/ popping dance techniques may be studied. Strong emphasis is placed on developing dance technique and performance skills, student choreographic projects, dance etiquette, leadership skills, and inspiring the next generation through dance. Students may learn about the pioneers of dance and/or the influential choreographers of today in dance history and how to critique dance. At times, dancers may even get the opportunity to learn from guest choreographers. This new initiative is designed to connect the dancers with the vibrant local dance scene.

Note – Dance Company Member Placement into a dance company will be based on a one-on-one consultation with the dance teachers, the schedule and the student’s ability level for the following classes. Students from Grade 9-12 can audition to be in part of a dance company. Auditions are held in May (dates TBD) and students will find out their placement in June. In the meantime, students are instructed to sign up for the credit they wish to receive based on their grade, not Squad or Studio.

Dance 9

DIFFERENT CLASSES OFFERED

Dance 9

Dance 9 provides students with opportunities to experience, understand, and value the art of dance through technical skills, and performance. Students will be immersed in jazz, ballet, contemporary dance, and hip hop. The basic elements of choreographing will be introduced to promote self-advocacy, confidence, and creativity. All male and female dancers will also discover more about the vibrant dance culture in Vancouver and develop an appreciation for the arts. Have fun creating dances to your favorite music in a dynamic and safe environment! No previous dance experience necessary. Course Fee of \$15

Just Dance!

This class is designed for students in Grade 10-12 of all genders who have no previous dance experience or are at a beginner to intermediate level.

This class focuses on dance and movement as a source of joy, self-expression, and fitness. Students have the opportunity to perform in Hands Up as well as learn a variety of dance styles. Formerly PE Dance 10, students will receive the appropriate credit for their grade level.

Junior Crew

Students in Grade 9-10 can register for this class if they are interested in learning mostly hip hop, animation, popping & locking, street dance, and be introduced to other dance styles along the way. Course Fee of \$15

Senior Crew

Students in Grade 11-12 can register for this class if they are interested in learning mostly hip hop, animation, popping & locking, street dance, and be introduced to other dance styles along the way. Course Fee of \$15

Squad Dance Company

This intermediate-level class is meant for students with previous dance experience looking to develop their dance technique and performance skills in a more challenging environment. Students may have the opportunity to perform in additional performances such as the school play (pending availability). Compositional skills are also developed. The emphasis is placed on jazz, lyrical, contemporary, and hip hop dance techniques. Course Fee of \$15

Studio Dance Company

This advanced-level class is meant for students with previous dance experience looking to develop their dance technique and performance skills in a more challenging environment. Students may have the opportunity to perform in additional performances such as the school play (pending

availability). Compositional & choreographic skills are an integral part of this class. The emphasis is placed on jazz, lyrical, contemporary, and hip hop dance techniques. Every student is expected to choreograph one dance per school year to be performed on stage. Course Fee of \$15

Physical and Health Education 10: Dance

For students who wish to focus on dance, get fit through fun dance combos and participate in the bi-annual "Hands Up" dance performances. Dance technique and performance skills are embodied and developed in a variety of genres or styles such as contemporary, lyrical, jazz, hip hop, etc. Dancers will collaborate through critical reflection, creative co-operation, and the exchange of ideas. An emphasis will be placed on promoting healthy living habits such as exercising as lifelong benefits. Come discover the fun in dancing! Course Fee of \$15

Dance Foundations 10

This course is intended for Grade 10 students who already have their Physical and Health Education 10 credit and looking to take a dance course. For students who wish to focus on dance, get fit through fun dance combos and participate in the bi-annual "Hands Up" dance performances. Different types of dance will be explored depending the class the student is in. This course will explore unique ways of exploring our identity and sense of belonging, while expressing ourselves through dance. Course Fee of \$15

Dance Performance 11

This class is for the students who want to enhance their technique and skills with experience in a variety of dance styles, further and expand their knowledge about dancing as an art form. Dancers will collaborate through critical reflection, creative co-operation, and the exchange of ideas. This course requires the commitment to perform in bi-annual performances of "Hands Up". Course Fee of \$15

Dance Performance 12

An opportunity for students who wish to continue performing at a more advanced level in various dance styles and are committed to participate in bi-annual performances of "Hands Up". Students will learn more extensively about dance history and dance critique to open up their minds to the diversity the dance world has to offer since aesthetic experiences have the power to transform our perspective. Throughout the year, dancers will develop perseverance, resilience, and risk taking.

Course Fee of \$15

Dance Choreography 11

Students who have developed their skills in various dance forms and are ready to take on more of a leadership role may register for this course. They will be required to perform as well as lead small and/or large group choreographies for school performances such as the Grade 8 Evolution dance, Hands Up, the school play, Basketball Spirit Game, etc. Student choreographers will learn how to create innovative pieces using various choreographic skills and methods. Choreographers will learn to make purposeful artistic choices to create and communicate meaning using various elements of dance and compositional skills. Course Fee of \$15

Dance Choreography 12

Well-seasoned dancers who would like the challenge in choreographing are invited to pursue their creative abilities in this area. They will learn to choreograph and teach choreographies performed at various school performances such as Hands Up and potentially the school play (space permitting). This class will require the student to create more advanced choreographies and to take on a leadership role in the dance program while communicating their artistic intent and meaning through their work. Choreographers will need to collaborate through critical reflection, creative co-operation, and the exchange of ideas to create innovative choreography. An emphasis will also be placed on music editing and production tasks. Course Fee of \$15

Section 3

Theatre Performance

GENERAL PROGRAM DESCRIPTION

The Handsworth Theatre program fosters community-building, personal and social awareness, agency, and excellence in stage productions. Students develop their performance, design, production, and leadership skills as ways to discover their potential as creators and storytellers. Students study and engage in wide range of drama activities and script work. Each year, the senior theatre and dance students create an original play. Throughout the school year, the students' theatre works are presented at Handsworth and Centennial Theatre.

Theatre Courses

Drama 8

In Drama, students will participate in drama games, scene work, and dance/movement routines. In a supportive and respectful environment, students perform a wide variety of characters in front of peers in order to build their confidence and public speaking skills. The core focus of this course is engaging as a collaborative ensemble and supportive audience.

Drama 9

Drama 9 is an introductory performance course, which aims to develop teamwork, confidence building, and creativity. This class will involve vocal and physical warm ups, drama games, character development, improvisation, play-building, and social justice scenes. The core focus of

this course is giving and receiving positive and constructive feedback, problem solving in small group work, and strengthening collaboration and communication skills. Students will end the year by co-creating and performing their own performance for Handsworth's annual Hands Up show at Centennial Theatre!

Drama 10: Theatre Acting

In Drama10, students engage in a wide range of acting exercises, body and voice training, experimental character development work, script analysis work, and scene and monologue performances. Students will have the opportunity to participate in various collaborative ensemble theatre projects and evening performances at Handsworth and Centennial Theatre.

Drama 11: Theatre Acting

In Drama 11, students expand on the skills developed in Theatre Acting 10. Students continue to be engaged in a wide range of acting exercises, body and voice training, experimental character development work, script analysis work, and scene and monologue performances. Students will have the opportunity to participate in various collaborative ensemble theatre projects and evening performances at Handsworth and Centennial Theatre.

Directing and Play Development 12

In Directing and Play Development 12, students expand on the skills developed in Drama 10 and 11. Working with peers in scene and monologue performances, students develop their leadership skills to

envision, direct, write, and perform live theatre performances. Students enrolled in this course are also required to sign up for an additional work period in order to direct younger peers in a different period. Throughout the school year, students develop their directing, play-developing, and acting skills for performances at Handsworth and Centennial Theatre.

Theatre Production 10

Theatre Tech 10 is an introduction to Stagecraft, which may include theatre history, stages, rigging, sound, make-up, costumes, props, set construction, and theatre lighting. Much of the course is laboratory in nature, which allows students to develop and to apply the practical skills of stagecraft. Students in this course must be able to work independently on the technical components related to the school productions at Handsworth and Centennial Theatre. Students are required to be available for regular out-of-class and evening rehearsals and performances. Due to the independent nature of this course, students are required to meet with the instructor beforehand to register for this course. Prerequisite: Interview with the Instructor (See David Beare for an interview).

Theatre Production 11

Theatre Production 11 is a continuation of Theatre Production 10. Much of the course will be laboratory in nature, allowing students to develop and to apply the practical skills of stagecraft. Students in this course must be able to work independently on the technical components related to the school productions at Handsworth and Centennial Theatre. Students are required to be available for regular out-of-class and evening rehearsals and performances. Due to the independent nature of this course, students are required to meet with the instructor beforehand to register for this course. Prerequisite: Interview with the Instructor (See David Beare for an interview).

Theatre Production 12

Theatre Production 12 is a continuation of Theatre Production 10 and 11. Much of the course will continue to be laboratory in nature, allowing students to develop and to apply the practical skills of stagecraft. Students in this course must be able to work independently on the technical components related to the school productions at Handsworth and Centennial Theatre. Students are required to be available for regular out-of-class and evening rehearsals and performances. Due to the independent nature of this course, students are required to meet with the instructor beforehand to register for this course. Prerequisite: Interview with the Instructor (See David Beare for an interview).

English 12 TP: Theatre and Performance

English 12 TP covers the same curriculum as English 12 (see English 12 course description) with students who are typically enrolled in a senior theatre, dance or tech production course. Students enrolled in English TP will be heavily involved in a complex theatre-making process, which may involve scriptwriting, choreographing, designing, and stage managing. Over the course of a year, students work collaboratively to co-create and perform an original play or an original interpretation of a play. Since 2000, the students' plays have been performed annually at Centennial Theatre.

Overall English 12TP provides the opportunity for students to inquire as a learning community and to explore the themes, topics, and connections that organically arise from the students' reading and writing assignments in the English 12 curriculum and the students' collective co-creation. While not required, typically students enrolled in English 12TP are also enrolled in Directing and Script Development 12, Theatre Production 12, or Dance 12.

\$30.00 for supplemental materials.

Section 4

Media Arts

In Media Arts, students study a variety of films and work as a production team to create original works. In theatre, students study and engage in script work, and the senior students create an original play. Throughout the school year, the students' film and theatre works are showcased at Handsworth or Centennial Theatre.

Media Arts Courses

Film 11

Film 11 provides opportunities for students to develop and strengthen the knowledge, skills, and attitudes they need in order to respond to and create film and television works. Through collaborative and project-based work, students will gain practical experience in some of the industry areas, such as analyzing film and television, technical and media literacy, creating storyboards, writing screenplays, editing, and production. Students will create commercials, recreate scenes from famous movies, and conceptualize and film various short films. Film assignments will be presented at lunch viewings, and the annual Handsworth Film Festival.

\$75.00 for supplemental materials.

Film Production 12

Film Production 12 is a continuation of Film 11. Through various projects, students will strengthen their ability to evoke meaning in their work, putting a stronger emphasis on story, character development and plot. Students will explore more deeply the post-production and distribution aspects of film. They will participate in community film projects and will

help plan the annual Handsworth Film Festival. Students will produce longer original films, and will have the opportunity to explore their own interests and passions in project-based work. Students will also explore animation, special effects, and advanced editing procedures, such as colour correction and enhancement. Employment and post-secondary options in the film and television industry will be explored.

\$75.00 for supplemental materials.

Section 5

Computer Science

General Program Description

Everybody in this country should learn how to program a computer as it teaches you how to think. The ability to break down complicated problems in to simple steps (that a machine can follow) is a skill that will benefit anyone in every walk of life.

Just as learning English has become compulsory in todays education system, the day will come, not far off from today, where the learning of a second language (coding) will be mandatory too. Computers are everywhere. Every industry has been turned on its head (impacted) by the technology it uses and the software that commands it.

Everyone depends on technology to bank, communicate, travel, entertain, and learn, but the majority of the population does not know how to read and write code. It is not good enough to be exposed to technology as all jobs in the future will require some understanding of how to operate it. The fact is that there are not enough people who are trained and have the skills necessary in today's job markets. Currently 1 million of the best jobs may go unfilled in North America (recruiting overseas) as there are not enough skilled people (locally) to fill them.

The reality is that you do not need to be a genius to know how to code, just determined. Coding is something that is learned, not a perspective that we are born with. The programmers of tomorrow will be the wizards of the future as the skills (magical powers) they posses will revolutionize our world.

Together, Let's Build Stuff...and Make Tomorrow Happen...

Course Descriptions

Information and Communication Technology 9

This course looks at the technology in and around our lives. The aim is to provide students a solid foundation of the technology found in schools and the workplace as well as to introduce students to the world of programming and engineering.

Students will be introduced to coding through the programming language Snap!—a visual, block based, drop-and-drag, web browser (JavaScript) programming language used in the TEALS curriculum. This project based learning environment will teach kids coding essentials while creating assorted puzzle, animation and game projects.

Next, the programming language Swift is tackled—Apple’s Swift Playgrounds is found in Apple (IOS App Development) products and used in the Learn to Code curriculum. In this segment of the course, students learn to code through the completion of animated interactive tasks.

At the end of each segment students will be given the opportunity to transfer the knowledge learned by programming machines (modular components include: drones, bots, robotics and raspberry pi).

Interwoven throughout the year, to prepare students for life in the digital age, students will examine topics such as internet use, cloud technologies,

social media, cyber ethics, digital literacy, desktop publishing, the full suite of Microsoft products and a number of online applications.

This course is designed to help anyone become familiar with technology and learn to code no matter the level of experience. Lessons are fun and interactive, focusing on a suite of guided games and puzzles that teach the foundations of coding. No experience or pre-requisite required.

Web Development 10

One of the most powerful tools of the 21st century is the internet as it has influenced everyone, in all walks of life, in every corner of the world. The intention of this course is to provide a solid understanding of how this marvelous wonder works. Students will be introduced to the art of website creation through powerful Content Management Systems (WordPress and Microsoft SharePoint). Next, students will be exposed to a variety of professional desktop and web-based resources, tools and applications in order to learn how to create and manipulate web content (text, sound,

pictures and video). The journey will continue into the realm of coding (HTML, CSS, JavaScript—the official languages of the web) allowing next-level development (Content Management System customization or website creation from scratch). By the end of the course students will have created several fully functioning websites embedded with artifacts created long the way. Student will be able to differentiate amongst a variety of web elements that include structure, content, style, design, functionality and interactivity. No experience or pre-requisite required.

Computer Programming 11

Taking Web Development to the next level with HTML, CSS and JavaScript. While coding is the focus of this course, students will learn how these languages fit together to create the front end (UI / UX) of the web. Students will be exposed to a variety of professional online resources (interactive IDE, videos and communities) intended to enrich a student's understanding of essential programming syntax, structures and constructs. Students will learn to modify existing code, predict the effects of code and develop programs to meet a specific purpose.

The end of the year will be career focused as students will have an opportunity to pursue specific projects based on interests ranging from modular programming (robotics, raspberry pi), computer hardware/software installation, mobile app development, networking hardware and of course programming. No experience or pre-requisite required.

Computer Programming 12

Java, used by over 9 million programmers, is the most popular language used in the industry by professionals due to its power and versatility. Java's ability to create a multitude of real world applications and provide a secure career is why Java is the focus of this course.

In this course, students will learn intermediate and advanced programming structures and constructs. Students will be exposed to a variety of professional online resources (interactive IDE, videos and communities) to enrich their learning. By the end of the course students will learn to decompose problems and create algorithms for the purpose of developing programs to meet a client's needs.

The end of the year will be career focused as students will have an opportunity to pursue specific projects based on interests ranging from modular programming (robotics, raspberry pi), computer hardware/software installation, mobile app development, networking hardware and of course programming. Students taking this course are recommended to complete Computer Information Systems 11 or Computer Programming 11.

AP Computer Science Principles

Students in AP Computer Science Principles will learn about the underlying principles of Computation and IOT (Internet of Things). The course covers a broad range of foundational topics such as programming, algorithms, the internet, big data, digital privacy and security, and the societal impacts of computing. The computer language used will be App Lab (Based on JavaScript with Text or Block-Based functionality). A directed study course (code.org) with a heavy emphasis on research and peer review.

The course is meant to be the equivalent of a first-semester university or college course in Computer Science. Students taking this course are recommended to complete Computer Information Systems 12 or Computer Programming 12 or have equivalent programming experience with JavaScript or Java. Upon completion of AP Computer Science Principles (and after achieving a score of 4 or 5 on the AP exam) students may be granted credit at some universities.

Optional AP Exam Fee \$150

Digital Media Development 11

Digital Media Development 11 is a computer lab and project based course. This course focuses on the technical side of Visual Media Development where students learn to execute projects from concept to production. Students work with a variety of media including graphic design, animation, audio production, video production, and web design. The course places emphasis on software used in the industry; such as, Adobe Photoshop, Illustrator, Premiere and InDesign.

Digital Media Development 12

Digital Media Development 12 is a continuation of Digital Media Development 11. Students refine their aesthetic sensibility and technical skills through various design opportunities. At the grade 12 level, students make advanced use of Adobe Photoshop, Illustrator, Premiere and InDesign. Students work in an independent manner to create a portfolio of digital media work.

Section 6

Music

GENERAL PROGRAM DESCRIPTION

The Music department at Handsworth is a very active place with rehearsals happening throughout each day, before and after hours, by our award winning students and ensembles. We make a great effort to provide the students with a rich experience in music and musical activities. These include frequent performances, festival attendance, local tours such as Whistler and Sun Peaks, and major tours such as New York, Cuba, and Italy. It is a comprehensive program of four Concert Bands, three String Orchestras, three Jazz Bands, and one Choir. Recent performances include The Senior Wind Ensemble performing at the UBC Chan Centre for the Performing Arts, and the Senior Jazz Band playing at the TD Vancouver International Jazz Festival Youth Showcase.

Every year Handsworth music students have the opportunity to audition for Provincial Honour Music groups and our school has been well represented in these ensembles. Every other year qualified students are invited to play in the District Honour Concert Band or String Orchestra. These district groups have the exceptional opportunity to play with the Vancouver Symphony Orchestra. A great variety of music is chosen to challenge and engage the students from classical to contemporary, as well as jazz, and pop. Small ensembles and self-directed jazz combos are encouraged and promoted.

Music Courses

Junior Blue Concert Band 8

This class is intended for Grade 8 students from the elementary band program as well as those who have previous experience on another instrument (such as piano, classical guitar, strings, etc.), but are

beginners to the Band Program. In addition to scheduled large group classes, the group occasionally meets throughout the year in specialty sectionals. Students self-organize and rehearse as a small group ("chamber ensemble") during the second term. Extra-curricular rehearsals, functions and performances are common, and attendance and full participation are expected from all members. A list of uniform requirements and music supplies will be provided at the beginning of the course.

\$40.00 for supplementary materials

Junior Gold Concert Band 8/9

The Junior Gold Concert Band is intended for the advanced Grade 8 and Grade 9 Band musicians. In addition to scheduled large group classes, the group occasionally meets throughout the year in specialty sectionals. Students self-organize and rehearse as a small group ("chamber ensemble") during second term. Co-curricular rehearsals, functions and performances are common, and attendance and full participation are

expected from all members. A list of uniform requirements and music supplies will be provided at the beginning of the course.

\$40.00 for supplementary materials

Orchestral Strings 8: Toccati 8

Grade 8 students have the opportunity to be part of the renowned String Orchestra at Handsworth. They continue to develop performing skills, and work together in cooperation as a group that includes the opportunity to audition for the more advanced level Concerti Strings. Instruments include the violin, viola, cello and string bass. Classical guitarists and harpists with music reading ability are welcome to join. Emphasis is placed on the enjoyment of music making with friends in a safe and caring environment. Students will be involved in continued improvement of their string instrument skills. Developing an understanding of music theory and history at an appropriate grade level is an important component leading to success in music making. Toccati 8 students typically advance to Concerti 9 in the following year.

\$20.00 for supplementary materials

Junior Gold Jazz Band 8/9

This class offers Grade 8 students (or first time jazz grade 9s) the opportunity to learn jazz. It is for students who have never played in a jazz band before. A jazz band is made up of a horn section, (saxophones, trumpets, and trombones), and a rhythm section, (guitar, piano, bass, vibraphone, drum set and percussion). The alto, tenor, and baritone saxophone players at Handsworth are typically students who play sax, flute, clarinet, or bass clarinet as their first concert band instrument. Sax players in jazz band will need to be able to "double" on flute or clarinet as they progress to the higher level ensembles. French horn players usually play trumpet in the jazz band. Baritone horn players play trombone and tuba players play bass trombone. The rhythm section instruments can be played by any one with guitar, piano, bass, or percussion skills, or by those students wishing to develop such abilities. Jazz Band is taken concurrently with Concert Band (or Strings) each year. Students receive an introduction to improvisation. The Gold Jazz Band program includes participation in a music festival as well as a music tour. A uniform is required.

\$40.00 for supplementary materials

Choir 8 to 12

This course encompasses a wide range of repertoire including contemporary, African, American spiritual and pop music. Students will: sing harmonies, perform solos, develop their vocal technique, learn music theory, and acquire music reading skills. Students participate in live performances including choral festivals, evening concerts as well as local and international tours. This class will be scheduled outside the timetable as a 9th course. A uniform is required.

\$40.00 for supplementary materials

Intermediate Concert Band 9/10

The Intermediate Concert Band is intended for grade 10 students as well as some advanced grade 9's. In addition to scheduled large group classes, the group occasionally meets throughout the year in specialty sectionals. Students self-organize and rehearse as a small group ("chamber ensemble") during second term. Co-curricular rehearsals, functions and performances are common, and attendance and full participation are expected from all members. There is a uniform requirement. There is the opportunity of a band tour every year. (Grade 10 beginners with music experience are welcome).

\$40.00 for supplementary materials

Senior Wind Ensemble 11/12

(Grade 11 & 12 beginners with music experience may be included, subject to an interview with the teacher)

The Senior Wind Ensemble performs at a top high school level, just below university caliber. In addition to scheduled large group classes, the players occasionally meet throughout the year in specialty sectionals. Students self-organize and rehearse as a small group ("chamber ensemble") during the second term. Co-curricular rehearsals, functions and performances are common, and attendance and full participation are expected from all members. There is a uniform requirement. There is the opportunity of a major band tour every second year (grade 11 or 12). The

past two tours were to New York City in 2015 and Cuba in 2017. The 2019 tour is to Italy.

\$40.00 for supplementary materials

Intermediate Jazz Band 9/10

This class offers Grade 9 and 10 students the opportunity to continue jazz at a higher level than the Junior Gold Jazz Band. The Intermediate Jazz Band is for students who have already played in a jazz band or students who have never played in a jazz band before but are advanced players of a concert band instrument. A jazz band is a team made up of a horn section: saxes, trumpets, and trombones, and a rhythm section: guitar, piano, bass, and drums. The alto, tenor, and baritone saxes at Handsworth are typically students that play sax, flute, clarinet, or bass clarinet as their first instrument. Sax players in jazz band will need to be able to “double” on flute or clarinet as they progress to the higher levels of jazz band. French horn players play trumpet or trombone in the jazz band. Baritone horn players play trombone and tuba players play bass trombone. The rhythm section instruments can be played by any one with guitar, piano, bass, percussion skills, or by those students wishing to develop such abilities. Jazz Band is taken concurrently with Concert Band (or Strings) each year. Select “Jazz Band” on your course selection form as a 9th course. The Intermediate Jazz Band program includes participation in a music festival as well as a music tour.

\$40.00 for supplementary materials

Senior Jazz Band 11/12

Senior Jazz Band offers Grade 11 and 12 students a very challenging exposure to the Big Band Jazz idiom. Solo playing and improvisation will be expected from all members. Those who elect this course are expected to be concurrently taking Senior Wind Ensemble at Handsworth. Extra individual practice above that required for Concert Band is expected as is attendance at co-curricular sectionals, full rehearsals, and all performances. Fundamentals of jazz theory are covered. Individual evaluations take place three times per year. There is a uniform

requirement. The group attends a local music festival and there is an opportunity for group travel each year.

\$40.00 for supplementary materials

Advanced Orchestral Strings: Chambers Strings 11 & 12

Orchestral Strings: Concerti and Chamber Strings 11 & 12 are offered for students who wish to advance their musicianship skills on orchestral stringed instruments. The Handsworth Chamber Strings has an emphasis on professional level diverse repertoire. Student-instigated musical leadership, developing independent advanced ensemble skills, expressive skills, and a high degree of self-critique will be cultivated. Instruments include the violin, cello, and string bass. Experienced classical guitarists, harpists and pianists must audition before admission. Emphasis is also placed on the enjoyment of music making with friends in a safe and caring environment. Students will be involved in continued mastery of their string instrument skills, develop performing skills, and work together in cooperation in a group including the opportunity for trips and concerts. Some concentration may be placed on self-directed music composition,

small ensemble performances, history studies, and alternative strings music.

\$20.00 for supplementary materials

Intermediate/Advanced Orchestral Strings 10: Concerti and Chamber Strings 10

Students in Grade 10 are mainly part of the Concerti Strings Orchestra, while some students may join the Chamber Strings group. Students will work for continued mastery of their orchestral stringed instrument skills as they progress to more advanced levels of playing. Developing performing skills and working together in cooperation in a group are stressed. Students will have the opportunity to audition for the most advanced performing ensemble, the Handsworth Chamber Strings if seats are available for auditions. Instruments include the violin, viola, cello, and string bass. Experienced classical guitarists, pianists and harpists are welcome and must audition before admission. Emphasis is placed on the enjoyment of music making with friends in a safe and caring environment.

Developing mastery of music theory and history at an appropriate grade level is an important component leading to success in music making. Music of all styles and genres is explored, to enhance professional ensemble skills. Typically, gr.10 Concerti students advance into Chamber Strings 11.

\$20.00 for supplementary materials

Intermediate/Advanced Orchestral Strings 9: Concerti, and Chamber Strings

Students in Grade 9 are mainly part of the Concerti Strings Orchestra, while some students may join the Chamber Strings group. Students will be involved in continued mastery of their orchestral stringed instrument skills as they progress to more advanced levels of playing. Developing performing skills and working in cooperation are stressed. Students will have the opportunity to audition for the most advanced performing ensemble, the Handsworth Chamber Strings if seats are available. Instruments include the violin, viola, cello, and string bass. Experienced classical guitarists, pianists and harpists are welcome and must audition before admission. Emphasis is placed on the enjoyment of music making with friends in a safe and caring environment. Developing mastery of music theory and history at an appropriate grade level is an important component leading to success in music making. Music of all styles and genres is explored. Students will remain in Concerti for one more year (Concerti 10), unless they qualify to join Chamber Strings 10 by an audition, provided there are available seats and positions in that class for the following academic year.

\$20.00 for supplementary materials

Section 7

Visual Arts

GENERAL COURSE DESCRIPTION

We are very lucky at Handsworth to work and live in an inspiring and natural environment. Visual arts students are able to look out the window and explore the school grounds to brainstorm, collaborate, and experience a unique landscape filled with textures, smells, and visual wonder.

Our programs offer a wide-reaching range of material, intellectual, and applicable skills for students to learn and thrive in the visual arts. We are able to work together to create applied design projects, ensemble sculpture, personalized journals, and everything in between.

Boasting the most comprehensive visual arts program in the district, we are lucky to offer students experiences with visiting artists like George Rammell and Amy Huestis, prominent community members, and speakers who expose our students to the wide-reaching world of art, design, and media.

Courses like Graphic Design & Printmaking 11/12 give students both hands-on approaches to image development, and digital exploration of the world of contemporary design. Likewise, Ceramics & Sculpture allows students to use their special skills to manipulate materials and create objects and experiences that occupy the third dimension.

Drawing & Painting 10/11/12 brings students together to create striking compositions, learn to manipulate materials, and produce two-dimensional artwork that speaks about our relationship with the world and that of the

artists who inspire us. Handsworth also offers an industry focused Media Arts 10/11/12 program that immerses students in the world of photography. We are very lucky to have a functional darkroom where students learn the art of photography from the ground up, as well as a digital computer lab and many professional-quality DSLR cameras to shoot and edit digital photographs.

We heartily encourage students to work together to learn and create works collaboratively that allow for students to learn from each other and from our visual arts educators – who have a combined 20-plus years of art education and training.

We engage students in real-world applications like designing for the school play (posters, t-shirts), creating logos, building props, and exploring issues in social justice and visual problem solving. Students also have the opportunity to explore life drawing with live models after school hours to develop drawing skills, materials exploration, and build solid, professional art and design portfolios.

Handsworth offers Advanced Placement art courses in 2-Dimensional Design, 3-Dimensional Design, and Drawing. These courses are designed for our artists who take their visual studies seriously. They develop a thematic body of work over the course of the year that is evaluated externally by the Advanced Placement board. Handsworth is the only school in North Vancouver that offers Advanced Placement courses in visual arts.

The Handsworth PAC has generously donated funds to allow us to grow our fantastic programs this year, allowing our students more opportunity with materials and equipment.

It is a pleasure to teach in such a diverse and rewarding field. We are fiercely proud of the artwork that our students are producing through experimentation and exploration of our resources here at Handsworth.

Visual Arts Courses

Visual Art 8

In Art, students develop their creative skills through drawing, painting, printmaking, sculpting and design projects. Many materials are provided such as quality drawing papers and pencils, graphic pens, tempera paints, and prisma colour pencils. Students are guided to see the world from an artistic point of view and enhance their perception. They will draw from observation and are encouraged to create original designs and to use their imagination. Students are also exposed to the many career paths in today's art world.

\$20.00 is charged for supplementary art materials.

Visual Art 9

Art 9 is a survey/foundations course that is an introduction to advanced courses. Skills in drawing, painting, design, ceramics and printmaking will be explored. Art elements and principles will be incorporated into projects. Originality will be emphasized and history of art will be integrated when appropriate.

\$30.00 for supplementary materials (including a good quality sketchbook)

Visual Art 10

Art 10 is a survey/foundation course that builds upon skills and strategies learned in Art 9 or Art 8. (Art 9 is not a prerequisite for this course). More advanced skills in drawing, painting, design, ceramics and printmaking will be incorporated into the course. Materials may include pastels, water colours, graphite, charcoal, prisma colour, linocut printmaking, acrylics, pen

and ink and clay. The elements and principles of art and design will be explored in art assignments, and originality will be emphasized. Art history will be incorporated where possible.

\$30.00 for supplementary materials (including a good quality sketchbook)

Studio Arts 2D 10 (Drawing and Painting)

This course is designed to develop drawing skills, with painting as a focus during the latter part of the year. Pencil, charcoal, ink, conte crayon, graphic design markers, chalk pastels, oil pastels, watercolour and acrylic paints will be the mediums used. Composition and design principles will be applied to still life, landscape, figure drawing and abstract subject matter. Drawing from observation will be emphasized, as this skill is required for post-secondary Art studies. Recognized artists as role models and inspiration will be discussed.

\$40.00 for supplementary materials (including a good quality sketchbook and watercolour paper)

Studio Arts 2D 11/12

This course develops the skills of Drawing and Painting 11 to a more competent level. Observation in drawing skills will be emphasized and abstraction will play a greater part in student work. During the second part of the year, portraiture, figure drawing and personal imagery will be encouraged and the student will be introduced to the exciting medium of oil sticks. Students will research and study several artists and will develop critiquing skills. Completion of Drawing and Painting 11 is an asset. NOTE: If you need to develop a portfolio for University or Art School, this course is imperative.

\$40.00 for supplementary materials (including a good quality sketchbook and oil sticks)

Studio Arts 3D 10 (Ceramics & Sculpture)

In Studio Arts 3D 10 students will develop techniques, presentation skills, and understanding of visual culture as these relate to three dimensional media. Techniques will include hand-building methods in clay such as coil and slab construction, wire and paper mache sculpture, mold making and casting processes, surface development methods, and visual design elements and principles. Presentation skills will include considerations of audience, artistic influences, exhibition and considerations and documentation of the design process. Visual culture will include knowledge of artists, artworks, and movements in ceramics and sculpture across a variety of contexts. Students working at the senior level will be expected to complete additional and more sophisticated works.

\$40.00 for supplementary materials

Studio Arts 3D 11/12(Ceramics & Sculpture)

This course is an advanced extension of Studio Arts 3D 11/12. Students will develop skill to a more competent level. Portfolio pieces, necessary for acceptance to Post-Secondary Art Institutions, can be developed.

Self-directed study is encouraged during the second part of the year.

Completion of Ceramics & Sculpture 11 will be an asset.

\$40.00 for supplementary materials

Art Studio 11

In this course, students engage in a variety of art- and image-development processes and strategies. Students will paint, sculpt, draw, create print editions, and explore a survey of artists and movements that inform and inspire art practice. Students in Art Foundations 11 will be well-prepared to develop portfolios, and excited to take our Grade 12-level courses. Art Foundations 11 is a great course to take to explore art-making, art history, and contemporary practice that is cutting edge and always changing.

\$40.00 for supplementary materials (including a quality, larger sketchbook)

Art Studio 12

Art Foundations 12 is a course designed for serious art students who plan to submit a portfolio for acceptance to a post-secondary institution, and to pursue a career in the art world. Students will be working in an independent manner but with focus on the necessary skills to enter their area of interest (e.g. fashion, graphics, fine arts etc.). Gallery reviews and experiments with art-related technology will be expected. New forms of personal imagery and ideas will be encouraged and incorporated into the course. Self-motivation and good time management skills are essential. \$40.00 for supplementary materials (including a quality, larger sketchbook)

Photography 10

Photography 10 is an introductory level photography course in which students are guided through photographic processes and use of light sensitive media, including darkroom processes, lighting, pinhole photography, film, and digital work with the single lens reflex camera. Students are expected to continue applying design concepts studied in Art 9 but with the camera, enlarger, and inkjet printer replacing pencil and brush. Applied technical skills such as digital imaging (with PhotoShop), presentation techniques, and film processing provide a foundation for the artistic vision of the student. Students will benefit from having their own SLR camera, either 35mm film or digital with manual control capabilities (see instructor).

Recommended prerequisite: Art 9

\$75 for supplementary materials (including film, photographic paper, and printer inks)

Photography 11

Photography 11 is an intermediate level photography course in which students continue developing skill with photographic processes and use of

light sensitive media introduced in Photography 10. Students are expected to continue applying design concepts studied at the grade 10 level with a greater emphasis on independent problem solving. At the grade 11 level, technical and aesthetic concepts are complemented by the study of the history of ideas in photography, encouraging creative personal expression. Students will be expected to demonstrate technical skill, skill with composition, and to exhibit a sophisticated creative approach to all assignments. Students must have access to a 35mm single lens reflex camera (film or digital) with manual control capabilities (see instructor). Recommended prerequisite: Art 10
\$75 for supplementary materials (including film, photographic paper, and printer inks)

Photography 12

This is an advanced level film and digital media course intended to build on technical skills acquired in previous courses and to develop a personal artistic direction. Students will be introduced to contemporary issues in media arts. Good time management skills are essential. Students must have access to a 35mm single lens reflex camera (film or digital) with manual control capabilities (see instructor). Recommended prerequisite: Photography 11
\$75.00 for supplementary materials (including film, photographic paper, and printer inks)

Graphic Art 11

In this course students apply drawing and design skills to both hypothetical and actual design problems. Technical instruction may include conventional media (marker and paint renderings), traditional printmaking (collograph, lino-cut and monotype), and digital media (Illustrator, Photoshop, and InDesign). These tools and techniques will be applied to the design of logos, packaging, brochures, and posters. Students will complete projects both individually and as members of design teams, much like real world

graphic design professionals.

Recommended prerequisites: Drawing and Painting 10 or 11.

\$35.00 for supplementary materials (includes a sketchbook and printer inks)

Graphic Art 12

Graphic Art 12 is an advanced commercial art course in which students will be expected to expand on designing skills from the previous courses in a more independent fashion. Assignments will be both 'job' or 'service' oriented as well as self-directed. Designing logos for school and community groups, the school's agenda book and school play promotions are examples of such topics. Students are recommended to take Graphic Design & Printmaking 11 and Drawing and Painting 11 or 12 before this course.

\$35.00 for supplementary materials (includes a sketchbook and printer inks)

Yearbook 11/12

The primary focus of this course is the completion of Handsworth's yearbook. Smaller projects are also undertaken. The yearbook is completed online using a variety of digital tools. Students enrolling in this class should have basic to advanced computer skills. Experience with, or mastery of the following skills are an asset but not requisite: Adobe InDesign, Adobe Photoshop, page design, layout, digital photography, journalism and editing. Students taking this course should be engaged in and shown leadership in a variety of extra-curricular school activities. Students enthusiastic about photography, journalism, digital publishing and creating memorable keepsakes for their entire student body are encouraged to register!

AP Studio Art: Drawing

The AP Studio Art course is designed for students who are seriously interested in the practical experience of art. AP Studio Art sets a national

standard for performance in the visual arts that contributes to the significant role the arts play in academic environments. The AP Drawing course is designed to address a very broad interpretation of drawing issues and media. Light and shade, line quality, rendering of form, composition, surface manipulation, and illusion of depth are drawing issues that will be addressed through a variety of means, which could include painting, printmaking, mixed media, etc. Abstract and observational works will be expected to demonstrate drawing competence. Students will be expected to complete the AP Drawing portfolio categories of quality, concentration, and breadth. Students are recommended to take Drawing and Painting 11 before this course.

\$50.00 for supplementary materials (including a good quality sketchbook and inkjet ink); \$150 Exam Fee for portfolio evaluation by the Advanced Placement Board in the United States. Students who score highly enough with the AP Board will receive 3 university credits, applicable to post-secondary institutions.

AP 2-D Design Portfolio

The AP Studio Art course is designed for students who are seriously interested in the practical experience of art. AP Studio Art sets a national standard for performance in the visual arts that contributes to the significant role the arts play in academic environments. This course is intended to address two-dimensional (2-D) design issues. Students are asked to demonstrate mastery of 2-D design through many two-dimensional mediums and processes, including, but not limited to, graphic design, digital imaging, photography, collage, fabric design, weaving, illustration, painting, and printmaking. Students will be expected to complete the AP Drawing portfolio categories of quality, concentration, and breadth. Students are recommended to take Graphic Design 11 before this course.

\$50.00 for supplementary materials (including a good quality sketchbook and inkjet ink); \$150 AP Exam Fee for portfolio evaluation by the Advanced Placement Board in the United States. Students who score highly enough with the AP Board will receive 3 university credits, applicable to post-secondary institutions.

AP 3-D Design Portfolio

The AP Studio Art course is designed for students who are seriously interested in the practical experience of art. AP Studio Art sets a national standard for performance in the visual arts that contributes to the significant role the arts play in academic environments. This course is intended to address three-dimensional (3-D) design issues. Students are asked to demonstrate mastery of 3-D design through many three-dimensional mediums and processes. Students will be expected to complete the AP Drawing portfolio categories of quality, concentration, and breadth. Students are recommended to take Ceramics Sculpture 11 before this course.

\$50.00 for supplementary materials (including a good quality sketchbook and inkjet ink); \$150 AP Exam Fee for portfolio evaluation by the Advanced Placement Board in the United States. Students who score highly enough with the AP Board will receive 3 university credits, applicable to post-secondary institutions.

Yearbook 11/12

The primary focus of this course is the completion of Handsworth's yearbook. Smaller projects are also undertaken. The yearbook is completed online using a variety of digital tools. Students enrolling in this class should have basic to advanced computer skills. Experience with, or mastery of the following skills are an asset but not requisite: Adobe InDesign, Adobe Photoshop, page design, layout, digital photography, journalism and editing. Students taking this course should be engaged in and shown

leadership in a variety of extra-curricular school activities. Students enthusiastic about photography, journalism, digital publishing and creating memorable keepsakes for their entire student body are encouraged to register!

Digital Media Development 11

Digital Media Development 11 is a computer lab and project based course. This course focuses on the technical side of Visual Media Development where students learn to execute projects from concept to production. Students work with a variety of media including graphic design, animation, audio production, video production, and web design. The course places emphasis on software used in the industry; such as, Adobe Photoshop, Illustrator, Premiere and InDesign.

Digital Media Development 12

Digital Media Development 12 is a continuation of Digital Media Development 11. Students refine their aesthetic sensibility and technical skills through various design opportunities. At the grade 12 level, students make advanced use of Adobe Photoshop, Illustrator, Premiere and InDesign. Students work in an independent manner to create a portfolio of digital media work.

Section 8

Language Arts

GENERAL PROGRAM DESCRIPTION

The general goals of English are the enjoyment of literature and the development of thinking and communication skills. These skills and content are ever-relevant in the modern world in various ways including forms of entertainment (via the creation of story and character in TV, film, music, and gaming), in various aspects of the business world (within presentations, marketing, and entrepreneurship), and in active citizenship (creating and analyzing arguments about a variety of local and world affairs). Understanding rhetorical tools and formats allows us to more actively articulate and engage with ideas. Speaking, listening, and writing are foundational skills that cross curricular boundaries and disciplines. Add to all of this the enjoyment of literature and we become fuller, more understanding human beings as we reflect on ourselves and the world around us.

Course Descriptions:

Humanities 8

Humanities 8 is an integrated approach to English 8 and Social Studies 8. The course includes complete coverage of both the English 8 and Social Studies 8 curricula while emphasizing common elements between the two based on human patterns and themes. Major units include the study of geography, history, and culture as well as those involving the acquisition of language arts skills through the practice of written and oral

Handsworth English Department Course Offerings Grades 10, 11 & 12

communication and the study of literature--including novels, short stories, myths, and poetry.

English 8

English Language Arts 8 provides students with the opportunity to become effective communicators, to develop and express their own ideas, and to think deeply and critically about the ideas of others. Major units involve the acquisition of language arts skills through the practice of written and oral communication and the study of literature--including novels, short stories, myths, and poetry.

English 9

English 9 builds on the skills developed in English 8. Students will explore connections between informational, story, multimodal, and poetry texts. Through writing, discussion, and creative projects, students will learn how to apply appropriate strategies to comprehend various texts and guide inquiry while developing critical thinking skills. Emphasis will be

placed on developing an awareness and appreciation of the diversity within society, including First Peoples, and how varying situations and perspectives are represented in texts. Students will continue to develop their paragraph and creative writing skills, and will be introduced to the expository essay format. There will be continued focus on how to refine texts to improve their clarity, effectiveness, and impact.

Literary Studies and Composition 10

Literary Studies allows students to delve more deeply into literature as they explore specific themes, periods, authors, or areas of the world through literary works. Students will plan, develop and create coherent, purposeful compositions. The focus in this course will be on formal / academic writing such as persuasive and synthesis essays, and to a lesser extent, narrative essays.

Literary Studies and Creative Writing 10

Literary Studies allows students to delve more deeply into literature as they explore specific themes, periods, authors, or areas of the world through literary works. Students will plan, develop and create coherent, purposeful compositions. The focus in this course will be on various creative forms of writing such as fiction and narrative essay writing, and, to a lesser extent, academic forms such as persuasive and synthesis.

Composition 11

Composition 11 is designed to support students as they refine, clarify, and adjust their written communication through practice and revision. Students will read and study non-fiction and fiction compositions by other writers and be exposed to a variety of styles as models for the development of their writing. The course provides opportunities for students to study, create, and write original and authentic pieces for a range of purposes and audiences. They will expand their competencies

through processes of drafting, reflecting, and revising to build a body of work that demonstrates expanding breadth, depth, and evidence of writing for a range of situations

Literary Studies 11

Literary Studies 11 allows students to delve deeply into literature. Students explore specific themes, periods, authors, or areas of the world through literary works (fiction and non-fiction) in a variety of media. Giving students the choice of a range of literary topics allows them to follow their passion and at the same time use literary fiction works to explore literary elements, styles and specific themes while they delve into Canadian and world literature.

English Studies 12

English Studies 12 is a mandatory course for graduation. Students will participate in an in-depth study of literary and non-fiction texts, including those from the perspective of Canada's First Peoples. While exploring thematic elements and stylistic techniques, students will engage in critical, creative, and reflective practices. As they explore a variety of purposes and audiences in meaningful formal writing activities, students will improve the clarity, impact, and effectiveness of their writing.

Creative Writing 12

Creative Writing 12 is an elective course designed for students who are interested in creating a body of work reflective of a sophisticated breadth and depth of skill. The course provides students with opportunities to specialize and publish in real-world contexts. Students engage in the exploration of personal and cultural identities, memories, and stories, in a wide range of genres. Within a supportive community, students will collaborate and develop their skills through writing and design processes,

celebrating successes. Students will refine their ability to write in complex, controlled styles with effectiveness and impact.

Section 9

Modern Languages

GENERAL PROGRAM INFORMATION

Core French

Welcome / Bienvenue to the Core French program! We offer a variety of engaging courses for students at all levels. Our courses provide opportunities for students to explore Francophone culture in addition to learning the elements of the language. See below for more information about each of the courses offered.

Spanish

Welcome / Bienvenidos to the Spanish program! Our courses offer students at all grade level the unique opportunity to explore Hispanic culture in addition to learning the elements of the language. We will be still offering a Beginners' Spanish course for students in Grades 10 and 11 (BSP11), with follow up courses in Grades 11 and 12. The classes are designed for beginner to intermediate levels of skill and language ability, with the language of instruction being both in Spanish and English. See below for more information about each of the courses offered.

Modern Languages Courses

French 8

French 8 is an exciting introductory course for Core French students. It focuses on the exploration of basic French, Francophone culture, and communication skills development. Students will have access to many different resources including the Discovering French Nouveau Bleu textbook, online resources and other texts.

French 9

French 9 continues the study of Core French begun in French 8. Students will have access to many different resources including the Discovering French Nouveau Blanc textbook, online resources and other texts. Language elements are reviewed and expanded, and vocabulary is enriched through authentic Francophone texts, songs, stories, videos and experiences. Students will continue to expand their knowledge of Francophone culture and develop their communication skills.

French 10

French 10 offers Core French students a third year of French language development. Students will have access to many different resources including the Discovering French Nouveau Blanc textbook, online

resources and other texts. Language elements are reviewed and expanded and vocabulary is enriched through authentic Francophone texts, songs, stories, videos, and experiences. Students will continue to expand their knowledge of Francophone culture and develop their communication skills.

French 10 Enriched

French 10 Enriched offers the same curriculum as French 10 with additional opportunities for language development. Students will have access to many different resources including the Discovering French Nouveau Blanc textbook, online resources and other texts. Language elements are reviewed and expanded, and vocabulary is enriched through authentic Francophone texts, songs, stories, videos and experiences.

Students will continue to expand their knowledge of Francophone culture and develop their communication skills with more of an emphasis on speaking and listening skills than the Core French 10 program.

French 11

French 11 offers students a comprehensive Core French course that builds on their language development and communicative skill development from French 8-10. Students will have access to many different resources including the Discovering French Nouveau Rouge textbook, online resources and other texts. Language elements are reviewed and expanded, and vocabulary is enriched through authentic Francophone texts, songs, stories, videos and experiences. Students will continue to expand their knowledge of Francophone culture and develop their communication skills.

French 11 Enriched

French 11 Enriched offers the same curriculum as French 11 with additional opportunities for language development. This is a comprehensive core French course that builds on students' language development and communicative skill development from French 8-10. Students will have access to many different resources including the Discovering French Nouveau Rouge textbook, online resources and other texts. Language elements are reviewed and expanded, and vocabulary is enriched through authentic Francophone texts, songs, stories, videos and experiences. Students will continue to expand their knowledge of Francophone culture and develop their communication skills. This class offers more opportunity for listening and speaking skill development than the French 11 course.

French 12

French 12 provides Core French students a unique fifth year of French language development. This elective course offers students the opportunity to explore language and culture through discussions, compositions, literature, research and continued communicative skill

development. This course builds on the language and cultural understandings that were acquired in French 8-11. *Successful completion of this course often provides students with first-year language requirements at many universities.

French 12 Enriched

French 12 Enriched is an alternative to the French 12 course. It also provides Core French students a unique fifth year of French language development. This particular elective course offers students not only the opportunity to explore language and culture through discussions, compositions, literature, research, and continued communicative skill development, but it also offers more opportunities to improve the students' speaking and listening comprehension skills. This course builds on the language and cultural understandings that were acquired in French 8-11. *Successful completion of this course often provides students with first-year language requirements at many universities.

AP French language

This course is designed to provide an advanced course to students who are willing to accept challenges to exceed their language abilities. The course will develop the four skills of listening, speaking, writing and reading equivalent to a college level course in French language. In the beginning of the year, students will be given the choice to either study a classical French play or create, as a group, their own original play and perform it to their peers as well as to other students from different schools. In March, students will study a classical novel. They will also be exposed to a variety of authentic materials such as textbooks, software, multimedia CD-Rom, Websites, articles from newspapers, as well as the French culture. Upon completion of French 12 AP (and after achieving a score of 4 or 5 on the AP exam), students may be granted credit at some universities (depending on each university's policies).

Optional AP Exam Fee \$150

Spanish 9

This introductory course in Spanish is designed for students in grade 8 and/or 9. While working with the En Español 1 program students will learn basic grammar such as the present tense, adjectives and sentence structure. Students will also be able to practice basic conversation skills where the focus is speaking about family, friends and hobbies. In addition, students will have the opportunity to explore in greater depth Hispanic culture from around the world, such as traditions, customs and celebrations. Upon successful completion, students will continue on to Spanish 10.

Spanish 10

This is the follow up course to Spanish 9! Students are supported in their development of their basic communication skills in Spanish. Students will continue their use of En Español 1 where they will work on sentence structure and conversation building, as well as their exploration of Hispanic culture. Upon successful completion, students will continue on to Spanish 11.

Beginning Spanish 11

This introductory level Spanish course has been developed for senior students in grade 10, 11 or 12. While working with the En Español 1 program students will learn basic grammar such as the present tense, future tense, adjectives, interrogative pronouns, etc. Students will also be able to practice basic conversation skills where the focus is on speaking about family, school, friends and hobbies. In addition, students will have

the opportunity to explore Hispanic culture from around the world, such as traditions, customs and celebrations. This is a faster paced course that covers more content than Spanish 9 and 10. Upon successful completion, students will continue on to Spanish 11.

Spanish 11

Spanish 11 is a continuation of either Spanish 10 or Beginning Spanish 11. Students will begin to expand their ability to use Spanish in

real-world situations such as travelling to foreign destinations, exploring Hispanic cultures (ie: market day in Oaxaca, Mexico) and talking about past experiences. Students will expand their grammar knowledge through real life every day vocabulary used to communicate realistic situations. Students will be given many opportunities to build their confidence with their listening comprehension and verbal skills. Upon successful completion, students will continue on to Spanish 12.

Spanish 12

Spanish 12 is a continuation of the En Español 2 program begun in Spanish 11. At this level students will continue to expand their vocabulary and grammar knowledge by focusing ever growing attention on listening comprehension and conversational skills. All of this is learned in the context of real life scenarios: going to the beach with friends, telling your siblings what chores to do, shopping in Spain, plans for post-graduation etc. Be amazed at how good your Spanish skills are after three or four years! *Successful completion of this course often provides students with first-year language requirements at many universities.

Japanese 9

This is a stand-alone introductory course in Japanese designed to give students a basic understanding of conversational Japanese. Students will be introduced to Japanese writing, including katakana, hiragana, and some kanji. They will learn to recognize the relationships between Japanese characters and sounds, and to derive meaning from speech and a variety of texts. Students will be able to describe similarities and differences between their own cultural practices and traditions and those of Japanese communities, and engage in experiences with Japanese people and communities. By the end of the course, students will be familiar with common, high-frequency vocabulary, sentence structures, and expressions, including types of questions, descriptions of people, objects, and locations, sequence of events, and personal interests, needs and opinions, as well as the use of past, present, and future time frames. Although not a requirement, students with an interest in our grade 9

Japan Exchange are encouraged to register. Depending on enrollment, this course may be offered outside the regular timetable.

Section 10

Business Education

GENERAL PROGRAM DESCRIPTION

Business is everywhere! Join us to get a head start on a career in the exciting, challenging world of business.

The Business Education Department at Handsworth offers a range of courses for students in Grades 9-12 that will prepare you for college and university business programs.

Students will learn a broad range of business knowledge including: computer applications (word, PowerPoint, excel), introduction to business and marketing, business ethics, personal finance, accounting, entrepreneurship, computer systems, to web design and technologies and more.

By teaching high school students the different subjects in business, they learn the intricacies of business and start to explore their business interests at a young age. Aside from using innovative educational content, we invite successful business people and professionals to share their knowledge with the students, allowing students to connect theory with practice.

Business Education Courses

Entrepreneurship & Marketing 9

This is an introduction to the world of business. This course introduces student to personal finance, budgeting, credit, banking, investments, real estate, corporate social responsibility, economics, marketing, ethics and legendary leaders of business. Students will use current events to further develop their understating of course materials. Students will have an opportunity to participate in an online stock simulation competing with students across the country.

Entrepreneurship & Marketing 10

Entrepreneurship & Marketing 10 continues to look at the World of Business. Basic business concepts will be applied to help explain what is

happening in the world around us. Students will cover a variety of topics including finance, economics, marketing, tourism and ethics. Students will have the opportunity to develop a business plan and learn the ropes of becoming an entrepreneur and how to best secure venture capital.

Marketing & Promotion 11

Students will look at the role of Marketing and the ways that Marketing and Promotion are used to persuade the public to buy a good or service. Students will learn how to design a Marketing Plan; the necessity and power of advertising; how to market at the different stages of the product life cycle; challenges of doing business across borders and the importance of E-Commerce. Students will look at the marketing and promotion involved with Sports Teams, the tourism industry and other Marketing Giants.

Marketing & E-Commerce 12

Students will look at the evolution of e-commerce and why it is such an important part of our economy. Local and global e-commerce environments will be explored as we look at what makes a successful marketing campaign, whether it be online or in a store. Students will look at how the Internet has become an important part of a company's advertising campaign. We will look at how companies can take advantage of our obsession with youtube, smart phones and all things digital.

Accounting 11

This course introduces students to basic accounting concepts: from accounting principles and concepts, such as, balance sheets, t-accounts, transaction analysis, revenue and expense accounts, income statements, and ledgers to applying these concepts to "real world" projects. Students will also gain knowledge of how services and products can be designed through consultation and collaboration. This course will also provide students with employment skills at the entry level. Students are also introduced to the use of Excel and Simply Accounting.

Accounting 12

Accounting 12 continues with the Accounting skills learned in Accounting 11 (Accounting 11 is a required prerequisite). This course generates the understanding of the adjustment process, adjusting entries and the worksheet, preparing for New Fiscal Years, adjusting for depreciation, accounting for cash receipts, cash payments, and controls for cash, along with knowing, the cash flow statement a how to manage a spreadsheet for cash flow. Students will also gain financial literacy skills to promote the financial well-being of both individuals and businesses. This course will also provide students with employment skills at the entry level and knowledge of first year University Accounting courses. Students are also introduced to the use of Excel Simply Accounting.

Economics 12

Economics 12 will provide students with a practical background in Economics including both microeconomics and macroeconomics. Why do people behave the way that they do? How do we allocate scarce resources? Why are gas prices so high? How does the value of the Canadian dollar impact our life? Why do we care about interest rates? Students will learn the appropriate tools to measure and evaluate economic activity and its impact, learning to analyze different economic scenarios and identify potential issues and outcomes. This will include looking at the Canadian Economic system and identifying how it operates including the principles behind government and social policies. Students will look at local and global trends and how Canada is impacted by different economic policies. This course is a great introduction to Economics for students planning to study Economics at the University level.

AP Microeconomics 12

The purpose of the AP course in microeconomics is to give students a thorough understanding of the principles of economics that apply to the functions of individual decision makers, both consumers and producers, within the economic system. It places primary emphasis on the nature

and functions of product markets and includes the study of Supply and Demand, Factor Markets, Market Structures, Costs of Production and how the government can intervene to promote greater efficiency and equity in the economy.

Particular emphasis is placed upon building economic theory at the university level in order to create a solid theoretical base for further economic inquiry.

Students will write the AP Exam in May and will receive their Exam mark in the summer. AP Exam Fee \$150

The Young Entrepreneurship and Leadership Launchpad (YELL)

The Young Entrepreneurship and Leadership Launchpad (YELL) provides students with a thorough understanding of how to apply entrepreneurial thinking to future studies, launching a business or entering the workforce post-secondary. Students interested in technology, entrepreneurship and innovation and those curious about how to put their ideas into action will benefit from the skills taught in this course as they prepare for life long success.

Why YELL?

- Students earn course credits for Entrepreneurship 12
- Work with teachers, business and community leaders and a mentor to design a student-led business concept.
- Connect with other business minded students and share ideas.
- Compete in a Venture Challenge to present their ideas to real-world investors and business leaders in the spring.

The course runs outside of the regular timetable after school for 2.5 hours and is divided into three semesters: Business Accelerator, Idea Incubator and a Venture Challenge.

The course runs on Tuesday, 3:30pm – 6:00pm, at Handsworth and on Monday, 3:30pm – 6:00 pm at Sutherland and Windsor.

Students interested in signing up for YELL must complete an external application.

For more information about the YELL program: www.weyell.org

If you would like to find out more about this great program please contact Mrs. Johnson. Applications will be available online in the New Year.

Section 11

Careers Education

Careers Program Courses

Careers 8

The Careers 8 curriculum is delivered through both large group assemblies and smaller group activities throughout the school year. Students will take part in a variety of activities and assemblies that will touch on goal setting, executive functioning, and the importance of healthy relationships.

Students will also complete interest and skills inventories as they begin to consider careers of interest.

Careers 9

The Careers 9 curriculum is delivered through both large group assemblies and smaller group activities throughout the school year. Students will participate in Take Your Kids to Work Day spending the day at the workplace of a parent, relative, friend, or volunteer host. Students will also learn about entrepreneurship and innovation and the many powerful tools and skills that come along with it. Lastly, students will participate in a workshop on the value of volunteering.

Career Life Education 10

Career Life Education helps students prepare to be lifelong learners who can adapt to changing career opportunities. Through activities and course assignments students discover that successful career and education paths require planning, evaluating and adapting. Students also explore how a network of family, friends, and community members can support and broaden their career awareness and options.

Career Life Education 10 applies to all students. Students must complete Career Life Education 10 in order to satisfy graduation requirements.

This course will cover topics in:

- Personal Development (self-assessment for career research, goal setting, lifelong learning, graduation requirements, personal financial planning and workplace etiquette)
- Connections to Community (global trends and the economy)
- Career Life Plan (employability skills, post-graduate opportunities, employment standards, labour and market trends, workplace safety, and work experience opportunities)

Career Life Connections 12 & Capstone Project

Career Life Connections 12 (including the Capstone Project) will replace Graduation Transitions and Planning 12 in the 2019/20 school year, when graduation requirements change. Career Life Connections and the Capstone Project require students to reflect on their knowledge and abilities, and to plan for life after graduation. Students will begin to learn about this course in Career Life Education 10 (replaces Planning 10). Students will participate in a variety of activities and mandatory seminars outside of the regular timetable to support the curriculum and the development of the Capstone Project.

All students must complete mandatory assignments, 30 hours paid or unpaid work experience, and the Capstone Project and presentation to complete the course. This is a graduation requirement.

WORK EXPERIENCE

The Primary goal of Work Experience is to help students prepare for the transition from Handsworth Secondary to the world of work. Through Work Experience, students have the opportunity to observe and practice the employability skills required in today's workplace as well as technical and applied skills relating to specific occupations or industries.

Other goals include helping students to:

- Connect what is learned in the classroom with the outside world of work Find out if a specific career is really what they think it is.
- Develop job readiness skills for specific occupations and careers.
- Understand the similarities and differences in behaviour standards between the workplace and school
- Build their resumes and skills to help open up other employment opportunities.
- Gain a variety of experiences and build their "basket of skills."

Placements can include traditional work sites, conferences, special student workshops, seasonal events....the opportunities are endless.

Handsworth Secondary School Career Development Programs are:

- Work Experience 11 (12A)
- Work Experience 12 (12B)
- Secondary School Apprenticeship Program

Students can take Work Experience 12A in Grade 11 and continue with Work Experience 12B in Grade 12, maximizing the community opportunities for students.

Section 12

Mathematics

General Program Description

All students are enrolled in Math 8&9 and then at the grade 10 level, Foundations of Mathematics and Pre-Calculus is the starting point for both the Foundations of Mathematics and Pre-Calculus pathways. When choosing a pathway, students should consider their interests, both current and future. Students and parents are encouraged to research the admission requirements for post-secondary programs of study as they vary by institution and by year.

For more information on course content and “Big Ideas” see ‘Building Student Success – BC’s New Curriculum’.

NOTE ON THE USE OF CALCULATORS

Any student who is unable to perform arithmetic calculations and algebraic operations with accuracy and reasonable speed is at a significant disadvantage in the study and application of mathematics. The use of calculators makes the performance of complicated calculations less tedious, but does not lessen the need for students to understand which concepts and operations are needed to solve a problem, to make sensible estimates, and to analyze their results.

Scientific calculators are highly recommended for all grade 9 and 10 mathematics courses with exponent and trigonometric keys. A graphing calculator is highly recommended for Foundations of Math 11 & 12, Pre-Calculus 11 & 12, and Calculus 12. Calculator instruction will be conducted with a TI-83 graphing calculator.

The main goals of the Mathematics courses offered in B.C. high schools are to prepare students to:

- use mathematics to solve problems by reasoning and analyzing;
- communicate and represent using mathematical vocabulary;
- make connections and reflect on mathematical thinking;
- understand and solve using multiple strategies.

For more information on course content, curricular competencies and “Big Ideas” see ‘Building Student Success – BC’s New Curriculum’.

Math Courses

Mathematics 8

Topics include perfect squares and cubes, square and cube roots, percents with financial literacy, proportional reasoning, operations with fractions, discrete linear relations and expressions, two-step equations, 3-D Object Geometry (Nets, surface area, volume), Pythagorean Theorem, central tendency and theoretical probabilities.

A scientific calculator is recommended but not necessary as there is an emphasis placed on developing number skills with fractions and decimals.

Mathematics 9

Topics include operations with rational numbers, exponents and exponent laws, operations with polynomials, two variable linear relations, multi-step one variable relations, spatial proportional reasoning, statistics in society and financial literacy. Scientific calculators are required.

Workplace Mathematics 10

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for entry into the majority of trades and for direct entry into the workforce.

Math Department Flow Chart

Topics include graphing, primary trigonometric ratios, metric and imperial measurement and conversions, surface area, volume, central tendency, experimental probability, and financial literacy of gross and net pay. NOTE: Students with a mark of C- or lower in Math 9 are strongly encouraged to take this course.

Foundation of Mathematics and Pre-Calculus 10

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in mathematics. This course leads to either Foundations of Mathematics 11 or Pre-Calculus 11.

Topics include operations on powers with integral exponents, prime factorization, functions and relations, linear functions, arithmetic sequences, systems of linear equations, multiplication of polynomial expressions, polynomials factoring, primary trigonometric ratios, financial literacy of gross and net pay. Scientific calculators are required. A minimum mark of C in Mathematics 9 is strongly recommended

Workplace Mathematics 11

This pathway is designed to provide students with the mathematical understandings and critical thinking skills identified for entry into the majority of trades and for direct entry in the workforce.

Topics include financial literacy of personal investments, loans, and budgeting; rate of change; probability and statistics in different contexts; interpreting graphs; and geometry of 3D objects including angles, views and scale diagrams.

Students who took Workplace Math 10 or students who earned 55% or lower in Foundations & Pre-Calculus 10 are strongly encouraged to take this course.

Foundation of Mathematics 11

This pathway is designed to provide students with the mathematical understandings and critical thinking skills identified for post-secondary studies in programs that do not require the study of calculus. Topics include: forms of mathematical reasoning; angle relationships; graphical analysis of linear inequalities; quadratic functions; systems of equations; optimization; applications of statistics; scale models; and financial literacy of compound interest, investments, and loans. A Texas Instruments TI-83/84/85 calculator may be recommended for the course.

Pre-Calculus 11

This pathway is designed to provide students with the mathematical understanding and critical thinking skills identified for post-secondary studies in programs that require the study of mathematics and calculus (eg: Business, Science, Math and Engineering). Topics include: real number system; powers with rational exponents; radical operations and equations; polynomial factoring; rational expressions and equations; quadratic functions and equations; linear and quadratic inequalities; trigonometry of non-right triangles and angles in standard position; and financial literacy of compound interest, investments, and loans.

A minimum mark of C+ in Foundations and Pre-Calculus 10 is strongly recommended. A Texas Instruments TI-83/84/85 calculator is highly recommended for the course.

Foundations of Mathematics 12

This course is designed to provide students with the mathematical understanding and critical-thinking skills identified for post-secondary studies in the arts or the humanities. Topics include: geometric explorations of constructions; conics; fractals; graphical representations of polynomial logarithmic, exponential, and sinusoidal functions; regression

analysis of these functions; combinatorics; odds, probability and expected value; and financial planning.

A minimum mark of C+ in Foundations of Math 11 or Pre-Calculus 11 is very strongly recommended. A Texas Instruments TI-83/84/85 calculator is highly recommended for the course.

Pre-Calculus 12

This course is designed to provide students with the mathematical understanding and critical-thinking skills identified for entry into math based post-secondary programs that require the study of calculus (eg: Business, Science, Math or Engineering). Topics include: transformations of functions; exponential functions and equations; geometric sequences and series; logarithmic functions and equations; polynomial functions and

equations; rational functions; and trigonometric functions equations and identities.

A minimum mark of C+ in Pre-Calculus 11 is very strongly recommended. A Texas Instruments TI-83/84/85 calculator is highly recommended for the course.

Calculus 12

This course is recommended for students interested in taking post-secondary calculus or pursuing careers in many diverse disciplines such as the biological and physical sciences, mathematics, business and engineering. Its purpose is to make the transition from high school calculus to technical school, college or university calculus less extreme.

Topics in Calculus include: limits and continuity; and differentiation and integration of algebraic, exponential, trigonometric and logarithmic functions. Practical applications of these skills as they apply to business, physics and statistics are also pursued. Students enrolling in this course must also be taking Pre-Calculus 12 or have previously completed Pre-Calculus 12.

A minimum mark of a B in Pre-Calculus 11 is very strongly recommended. A Texas Instruments TI-83/84/85 calculator is highly recommended for the course.

AP Calculus – AB

An advanced placement course in Mathematics consisting of work in Calculus and related topics comparable to courses in colleges and universities. It is expected that students who take AP Calculus will be taking calculus at the university level. Topics covered in this course are similar to the ones in Calculus 12, but are covered more in depth. AP

Calculus is intended for students who have already completed the Pre-Calculus 12 course, preferably with a minimum mark of an A.

The AP Calculus - AB examination will be written in early May. Students who are planning on writing the AP Calculus exam in May must be prepared to put in extra time over and above what is assigned in class. Students in AP calculus will receive a school mark for AP Calculus even if they do not write the AP Calculus exam in May however, they cannot use a school mark to be granted a university credit. If they achieve a score of 4 or 5 on the AP exam, students may be granted credit at some colleges and universities.

Note: There is a fee to write the AP Calculus

Section 13

Physical Education

Physical and Health Education Courses

Physical and Health Education 8

Physical and Health Education 8 is designed to develop the student's holistic understanding of health and well-being. Students in PHE 8 will participate in different types of physical activities, sports and games. This activity based play allows students to develop knowledge, skills and the mindset to remain physically active and healthy over their lifetimes. In addition, there is an added focus on the non-physical aspects of social and mental well-being, individuality, and overall health.

Fee of \$25 for supplementary materials

Physical and Health Education 9

Physical and Health Education 9 continues to develop the student's holistic understanding of health and well-being. Students in PHE 9 will participate in physical activities, sports and games designed to further reinforce the development of movement education, active living, as well as personal health and social responsibility. Students will engage in learning activities designed to improve their understanding of the components of a healthy lifestyle and their understanding of mental health.

\$25 for Supplementary Materials

Physical and Health Education 10

Physical and Health Education 10 is the culminating year of our junior PHE program at Handsworth. Students in PHE 10 will continue to participate in different types of both indoor and outdoor physical activities, sports and games. This activity based play reinforces the development of movement

education and active living. Students improve upon the skills and techniques learned in the earlier grades while also learning more complex skills and concepts. While continuing to improve upon their own physical literacy, PHE 10 students will also focus on their own personal fitness and well-being. Finally, students will engage in learning activities designed to improve their understanding of the components of a healthy relationship, further their knowledge regarding mental health and consider the effects of health upon our society.

\$30.00 for Supplementary Materials

Physical and Health Education 10: Dance

For students who wish to focus on dance, get fit through fun dance combos and participate in the bi-annual "Hands Up" dance performances. Dance technique and performance skills are embodied and developed in a variety of genres or styles such as contemporary, lyrical, jazz, hip hop, etc. Dancers will collaborate through critical reflection, creative co-operation, and the exchange of ideas. An emphasis will be placed on promoting healthy living

habits such as exercising as lifelong benefits. Come discover the fun in dancing! Course Fee of \$15

Active Living 11/12

Active Living 11/12 is an extension of the junior PHE program. Like junior PHE, students will participate in activities which further reinforce the development of movement education, active living and personal and social responsibility. As well, there is an added focus on the non-physical aspects of activity– finding recreational activities that can be enjoyed beyond the classroom, developing good safety practices to ensure lifelong participation in physical activity and overall good health and well-being.

Fee of \$30.00 for supplementary materials

Active Living 11/12 - Community

Active Living Community - previously known as PE 12- is a fun, active course designed to get students engaged in the broader fitness community. The course focuses on the ministry “Big Ideas” that Physical activity is an important part of the overall health and well being of students. This course

will give students the opportunity to enjoy recreation activities that will serve to motivate youth to participate more regularly in physical activities. A combination of school based and off campus activities may include floor hockey, basketball, jujitsu, boxing, yoga, bowling, hiking and other community based activities. Please note that there is a fee associated with some off campus events. Students are responsible for transportation to and from events.

\$125.00 for supplementary materials

Athletic Leadership 11/12

Athletic Leadership 11/12 is a Handsworth specific course designed for highly motivated students who wish to enhance their leadership skills

while working within the Handsworth Athletic Program. Students will be part of a Student Athletic Department that will work closely with the Handsworth Athletic Coordinator, as well as coaches and athletes to enhance the athletic opportunities for Handsworth students. Athletic Leadership students will support varsity teams, promote student athlete recognition, coordinate and help with sport officiating, organize and run intermural programs and promote school athletics and events. Students are expected to be available for numerous athletic events which occur outside the regular school day.

Physical and Health Education 10: Fitness and Conditioning
Physical and Health Education 10: Fitness and Conditioning

Physical and Health Education 10: Fitness and Conditioning course is primarily a resistance training class that focuses on improvement with physical function. A student works with a training plan and sets goals in an effort to be quicker, faster, and stronger. The goal is safe whole body improvement with an emphasis on core stability. The class is hard work and demands desire and commitment. The opportunity to individualize your training plan is a benefit to each student. The course will also touch on additional areas of fitness such as nutrition, rest, life skills, goal setting, physiology, and training principles. This course is a good fit for student athletes who wants to improve physical function or students who would like to improve how they feel about their body and their fitness.

\$5.00 for supplementary materials, guest instructors, and outside classes.

Fitness and Conditioning 11/12

Fitness and Conditioning 11/12 course is an extension of Physical and Health Education 10: Fitness and Conditioning. Students can continue with their physical development. Students can strive for individualized goals with regards to improvement in physical fitness and physical performance. Fitness and Conditioning 11/12 is a physically and mentally demanding course that offers earned rewards for the motivated.

\$5.00 for supplementary materials, guest instructors, and outside classes.

Fitness and Conditioning 10/11/12 - Girls

Fitness and Conditioning 10/11/12 - Girls course is primarily a resistance training class that focuses on improvement with physical function. A student works with a training plan and sets goals in an effort to be quicker, faster, and stronger. The goal is safe whole body improvement with an emphasis on core stability. The class is hard work and demands desire and

commitment. The opportunity to individualize your training plan is a benefit to each student. The course will also touch on additional areas of fitness such as nutrition, rest, life skills, goal setting, physiology, and training principles. This course is a good fit for the student athlete who wants to improve physical function or any student who would like to improve how she feels about her body and their fitness. The girls Fitness and Conditioning 10/11/12 - Girls block is a desire to cater more to girls and improve the environment for girls to work on their fitness.

\$5.00 for supplementary materials, guest instructors, and outside classes.

Section 14

Science

GENERAL PROGRAM DESCRIPTION

Science and scientific literacy play a key role in educating you today for the world you will live in tomorrow. Science courses develop your abilities to think critically, solve problems, and make ethical decisions; to communicate your questions, express your opinions, and challenge your ideas in a scientifically literate way; and to exercise an awareness of your role as an ecologically literate citizen, engaged and competent in meeting the responsibilities of caring for living things and the planet.

Scientifically literate citizens are able to use scientific evidence, as well as their knowledge from other areas of learning, to develop their own views, discuss and debate, and make informed decisions in their daily lives and about broader issues, while maintaining their curiosity and wonder about the natural world.

Science courses include content from biology, chemistry, physics, earth and space sciences, anatomy and physiology, and environmental science.

Science Courses

Science 8

Science 8 is an introduction to four disciplines: Biology, Chemistry, Physics, and Earth Science. Students learn lab safety and proper equipment use. Observation and analysis are skills developed in this lab oriented course. Topics covered include processes of science, cells and systems, optics, kinetic molecular theory, atomic theory, and plate tectonics. The course includes a year long Science Fair Project.

Science 9

Science 9 continues the study of Biology, Chemistry, Physics, and Earth Science. Observation and analysis are skills developed in this lab oriented course. Topics covered include cell division and reproduction, the periodic table with elements and compounds, electricity, matter cycles, and sustainability with a focus on First People's knowledge.

Science 10

Science 10 extends knowledge of Biology, Chemistry, and Physics with the addition of Space Science. Observation and analysis are skills developed in this lab oriented course. Topics include genetics, diversity, chemical reactions, energy transformation during motion, local and global impacts of energy from technology, nuclear energy, and the formation of the universe.

Life Sciences 11

This Biology 11 course is the study of life. It includes the study of the scientific method, cell biology, evolution and adaptation, classification, and taxonomy. Our studies will include viruses, bacteria, protists, plants and animals. Plants and animals are surveyed, simple to complex, involving microscopic analysis and dissection. It is strongly recommended that students planning on taking Anatomy and Physiology 12 and/or post-secondary studies in Biology, enroll in Life Sciences 11.

Anatomy and Physiology 12

This biology course involves a study of cell biology and the human body. Topics include: biochemistry, cell biology, human physiology of major body systems, and dissection of a fetal pig. Students will benefit from completing Chemistry 11 and Life Sciences 11 prior to taking this course.

Physics 11

Physics 11 includes kinematics, dynamics, momentum, and energy. Kinematics is the study of motion, while dynamics is the study of the forces that cause motion. Optional units include waves, nuclear fission and fusion, quantum physics, and special relativity. Students will develop critical thinking skills through solving problems in familiar and unfamiliar. Students will also build skills in observation, measurement and analysis through hands on laboratory experiment.

Physics 12

The Physics 12 is an algebra based course geared towards those students interested in the fundamental understanding of physical phenomena. The two disciplines covered are Newtonian Mechanics and Electromagnetism. From Classical Mechanics students will study 2-D kinematics and dynamics, circular motion and equilibrium. From Electromagnetism students will study electrostatics, circuits and electricity & magnetism. It is recommended that the student has archived 70% or higher in Physics 11 and have a strong background in mathematics.

Environmental Science 12

Students in grades 11 or 12 are eligible to take this Ministry approved Environmental Science 12 course which looks at key areas and ideas that will shape the future of our Earth. The course explores four big ideas, all looking at how human actions affect the environment we live in: Water - 100% necessary for life. How do our human actions affect the quality of water and its ability to sustain life? How do our human activities (like industry, travel, etc) affect our global climate and impact climate change? Sustainable land use is essential to feed and house our growing population. The final topic in this course is to look at how sustainable

living supports the well-being of self, community and the Earth. Students will have the opportunity to explore these topics from a local and personal lens, considering personal and community responsibilities that will shape future ecosystems.

Chemistry 11

Chemistry 11 extends the student's knowledge of chemistry concepts, skills, and techniques. Topics include the mole concept, solutions, chemical reactions and organic chemistry. Considerable laboratory time is spent on experiments, developing skill in observation, and measurement and analysis. Problem solving, chemical calculations and lab report writing skills are also developed throughout this course.

Chemistry 11 Enriched

The course will cover a general introduction to chemistry, the mole concept, reactions and stoichiometry, states of matter, atomic structure and bonding, solutions and their properties, as well as basic organic chemistry. Many topics are covered in greater depth than the regular Chemistry 11 course, and the course has a faster pace. It is recommended students considering Chemistry 11 Enriched have a strong standing in Science 10 (MSC-10), Math 10 (MFMP-10), and are strongly advised to consult with, and receive the recommendation of, their current science teacher. Students planning to take Chemistry 12 AP in the future are encouraged to take this course.

Chemistry 12

Chemistry 12 is a continuation of concepts, skills, and techniques stressed in Chemistry 11. Topics include reaction kinetics, chemical equilibrium, solubility, acid-base chemistry, and oxidation/reduction. Skill development continues in laboratory work and formal report writing as well as continued work in measurement, mole calculations and chemical reaction calculations. (Recommended: Chem 11 C+ or higher)

AP Chemistry 12

Topics include reaction kinetics, chemical equilibrium, solubility equilibrium, acid-base chemistry and electrochemistry. It is a fast-paced course, intended for students planning a career in the sciences and engineering fields. Students taking ACHE-12 have the option of writing the AP Chemistry examination in mid May. Upon completion of AP Chemistry 12 (and after achieving a score of 4 or 5 on the AP exam) students may be granted credit at some colleges and universities.

\$150.00 AP Exam Fee

Social Studies

General Course Description

The general goals of Social Studies are the development of thinking and communication skills through the study of various aspects of history, geography, and culture. Students examine major patterns of conflict, change, cooperation, and development while, above all, reflecting on the historical importance of various peoples' attempts to be endowed with rights and respect while also improving society overall. Key skills for emphasis include written and oral communication, critical thinking, personal development, and social responsibility. These skills and content are ever-relevant in the modern world in various ways as active citizenship requires individuals to create and analyze arguments about a variety of local and world affairs. Furthermore, various occupations and industries depend upon knowledge and understanding of the content and patterns embedded within the disciplines of geography, law, history, and psychology; these include: the entertainment industry (TV, film, literature, and gaming); the business world (marketing, product-development, law, and entrepreneurship); and the building and resource industries (architecture, urban planning, and resource-management) to name a few.

Social Studies Courses

Humanities 8

Humanities 8 is an integrated approach to English 8 and Social Studies 8. The course includes complete coverage of both the English 8 and Social Studies 8 curricula while emphasizing common elements between the two based on human themes and processes. Major units include the study of geography, history, and culture as well as those involving the acquisition of language arts skills through the practice of written and oral communication and the study of literature--including novels, short stories, myths, and poetry.

Social Studies 9

The purpose of Social Studies 9 is to develop student's growth as creative and knowledgeable Canadians and world citizens. It is an inquiry process that offers students the opportunity to develop, reinforce and expand upon geographical and historical knowledge, and skills that were introduced in Humanities 8. The critical thinking skills introduced will allow for information gathering from various sources; analyzing and interpreting resource; presenting and justifying your position on issues; decision-making; and working cooperatively with others. The Social Studies

9 curriculum includes current events, social issues and philosophies that influence the development of Europe and North America from the 18th to 20th centuries.

Social Studies 10

Social Studies 10 will build on the skills, processes, and themes introduced and developed in earlier Social Studies and Humanities classes to develop students as active and responsible Canadian and Global citizens. The critical thinking skills reinforced will allow for information gathering from various sources; analyzing and interpreting resources; presenting and justifying positions on issues; and informed decision making. Social Studies 10 will focus on the 20th century conflicts, events and forces that have shaped modern Canadian politics, political systems and the modern Canada Identity. First Nations culture and histories are also explored.

Explorations in Social Studies 11

Are you unsure what Social Studies course to take in Grade 11? If so Explorations in Social Studies 11 might be for you!

Explorations in Social Studies 11 will explore elements of Law Studies, Social Justice, Twentieth Century World History, Human and Physical Geography, Comparative Cultures, and Asian Studies. In doing so, students will get the chance to sample aspects of the senior Social Studies electives that they may wish to pursue the following year.

Psychology

* Please note that this course does not fulfill the Grade 11/12 Social Studies requirement, as it is a locally developed course.

Psychology 11 is a course about human nature. Students will try to unravel some of the mysteries of why people behave, think and feel as they do. Course content includes psychological theories, adolescent development, personality and abnormal psychology. Students will be encouraged to

further their critical thinking skills in the evaluation of psychological theories and issues. Class participation and the development of research skills play a large role in student success in this course.

20th Century World History 12

History 12 is an interesting, academic elective that provides a comprehensive study of the major events of the 20th Century. From the close of WW1 through the inter war years of Boom and Bust, WW II and the Cold War era of Nukes and Proxy wars such as Vietnam, to the post-Cold War new world order, we'll look at how those events continue to impact our 21st century world today. Our investigation will not be limited to North America and Europe, but will also include Asia, Africa, the Middle East and Latin America. This provocative course allows students to discuss and debate past and current affairs along-side providing future opportunities to link history to life-long learning as they embark on the next chapter of their life's journey.

Physical Geography 12

Geography 12 is a practical course that offers students a closer look at the systems that affect our planet. The course will combine concepts related to physical geography, human geography, and may also explore urban studies. Thus, we will examine a variety of global concepts: weather and atmospheric science; climate change and its impacts on Canada and the rest of the world; weathering and the formation of the earth's crust; and earthquakes and their associated phenomenon. Students will learn how human populations affect the earth and its interconnected systems. Case studies pertaining to natural resource management, environmental sustainability, city design and land use will allow students to gain a better understanding of the world and our place in it. Walking field studies and a variety of media and film will be used in this course.

Social Justice 12

This student-directed course provides students the opportunity to explore social justice movements and take action on the issues that matter to them. Social movements that may be investigated include: basic human rights, Indigenous rights, civil rights, eco-justice, gender and equity, LGBT2Q+ equality, and issues of globalization and unequal development. As well as inquiring into historical and contemporary social justice movements that continue to shape our world, students put their learning into practice. Throughout the year, students analyze different methods of creating social change and test out these methods by collaboratively creating a social justice campaign of their own. Whether it is many small campaigns focusing on different issues, or one larger project, this elective provides students with the vocabulary and theory to create meaningful change in their current and future communities.

Law Studies 12

Law Studies 12 introduces students to the basics of Canadian Law: our judicial system, court procedure, criminal law, civil law, and youth law. During the year, students will be exposed to several famous cases, prominent guest speakers, and student debates. Involvement is essential as actual cases, and discussions are frequently utilized to provoke thought.

Comparative Cultures 12

Comparative Cultures 12 is a unique history course as it allows students to immerse themselves in the day-to-day life of people from pre-modern times. We cover topics including: mythology and religious belief; citizenship and government; social class and status; and gender roles (including ideals, status, and ‘heroes’). We also discuss: cultural traditions, entertainment, and past times; art and architecture; and major historical events. Our focus civilizations often include, but are not limited to, Classical Greece, Ancient Rome, Ancient Egypt, the Maya, the Vikings, and Feudal Japan. We compare these to each other and our own modern society as the class defines, evaluates, and reflects upon the nature of civilization. This course may be particularly useful for students who foresee careers in film, business, marketing, gaming, design, etc. as these civilizations continue to inspire entertainment, brands, designs, and trends throughout the modern world.

BC First Peoples 12

BC First Peoples 12 explores the richness and diversity of BC’s numerous First Nations cultures. Through a multidisciplinary field, students will examine important historical, cultural, social and political realities that have and continue to impact the lives of Aboriginal peoples in Canada. Guest artists, field trips and authentic teaching and learning methods are used for enrichment whenever possible. On completion of the course, students will have gained valuable cultural knowledge for themselves and

excellent preparation for university level anthropology and social science studies.

Genocide Studies 12

Genocide Studies is an interesting new course offering at Handsworth. Students will examine atrocities that have had political, social and cultural ramifications. Topics may include the Armenian genocide, Collectivization in the USSR, the Holocaust, Rwandan genocide, cultural genocide, and current problem spots around the world. Students will learn that intentional destruction of peoples and their cultures is not inevitable, and such attempts can be disrupted and resisted. Genocides share similarities and targeting groups of people continues to challenge global peace and prosperity.

Section 16

English Language Learners

English Language Learners Courses

ELL Beginner 8-12 (English for Language Learners 8-12)

This is the foundation course for ELL or International students in the beginning, developing, and expanding phases of English language learning. This course focuses on building social and academic vocabulary, improving grammar, developing sentence and paragraph structure, and improving speaking and listening skills. This course can be taken by ELL or International students at any grade level. Upon completion of this course, an individual assessment is done by the ELL specialist to determine the next placement for each student.

Language Strategies 10-12

This course is designed to enable ELL or International students to learn strategies and extend skills in the four main language areas of reading, writing, listening, and speaking. Designed for expanding and consolidating language learners, this course provides opportunities to acquire and practice the strategies necessary for successful reading and writing across the curriculum. Students will explore how language is used to enable growth, communication, and academic success.

Studies in BC Culture

This course develops the ELL or International student's ability to analyze and think deeply about the nature of human societies and our relationship to the environment and one another. The course will provide students with the reading, writing and oral skills necessary to explore the diverse beliefs, expectations, and values of the modern citizen. BC Culture is recommended for ELL or International students who are expanding and consolidating their English language skills.

ELL Seminar

This small-group lunch time seminar is designed to provide language support for consolidating and expanding language learners who no longer require a direct block of ELL support. This seminar focuses on extending language skills and strategies for academic success and creating a community of learners. Upon completion of this course, an individual assessment is done by the ELL specialist to determine the next placement for each student.

Section 17

Applied Skills

Applied Skills Courses.

Applied Design, Skills and Technology Rotation

Applied Design, Skills and Technology Rotation includes three courses that run for approximately 3 months. Students have a choice of two ADST package options.

Students are provided an opportunity to engage in each of these practical areas of study.

Applied Design, Skills and Technologies 8 Rotation: Robotics

Robotics 8 is one-term course offered in conjunction with a term each of Computational Thinking and Entrepreneurship and Marketing. This course focuses on uses of robotics in local contexts, including types of sensors, user and autonomous control systems, uses and applications of end effectors, movement- and sensor-based responses, program flow, interpretation and use of schematics for assembling circuits, identification and applications of components, and various platforms for robotics programming.

Applied Design, Skills and Technologies 8 Rotation: Textiles

Textiles 8 is a one-term course offered in conjunction with a term each of Woodwork and Computational Thinking. This course examines sources of textile materials, hand and machine construction techniques for producing and/or repairing textile items, basic components of patterns and instructions, colour as an element of design, and personal factors that influence textile choices, including culture and self-expression, and the impact of those choices on individual and cultural identity.

Applied Design, Skills and Technologies 8 Rotation: Woodwork

Woodwork 8 is a one-term course offered in conjunction with a term each of Textiles and Computational Thinking. This course examines the historical and current contexts of woodworking. Students will develop the skills to identify characteristics, and properties of a variety of woods, both manufactured and natural, and explore elements of plans and drawings, woodworking techniques, and options for reuse of wood and wood products.

Applied Design, Skills and Technologies 8 Rotation: Computational Thinking

Computational Thinking 8 is a one-term course offered in conjunction either with a term each of Textiles and Woodwork, OR a term each of Robotics and Entrepreneurship and Marketing. This course explores software programs as specific and sequential instructions with algorithms that can be reliably repeated by others, debugging algorithms and programs by breaking problems down into a series of sub-problems, and programming languages, including visual programming in relation to text-based programming and programming modular components. Students in Computational Thinking will develop foundational computer skills used throughout their high school education.

Applied Design, Skills and Technologies 8 Rotation: Entrepreneurship and Marketing

Entrepreneurship and Marketing 8 is one-term course offered in conjunction with a term each of Computational Thinking and Robotics. This course examines characteristics of entrepreneurial activity, recognition of a market need and identification of target market, development of a product or service, including its features and benefits, forms of advertising and marketing that can influence a potential customer or buyer, differences between consumer wants and needs, and the role of money management in financing an idea or developing a product.

Applied Designs, Skills & Technology - Textiles 9

This course builds upon the skills introduced from Life skills 8 Textiles. Students will analyze sewing methods, different seam finishes and design ideas while creating several useful garments and handy textile items. While developing their garment or item, consideration will be given to the social, environmental and ethical impact their textile will have on the local and global communities. Throughout the year, projects are decided upon in consultation with the classroom teacher. Students typically finish four projects such as a zippered toiletries kit, a hoodie, a small knitted project and an independent choice project.

Students are expected to know the following:

- Range of uses of textiles
- Variety of textile materials
- Hand construction techniques for producing and/or repairing textile items
- Consumer concerns that influence textile choices, including availability, cost, function (waterproof), and textile care.

Course Fee of \$15

Applied Designs, Skills & Technology - Textiles 10

This course is designed to build upon the skills introduced from Textiles 9. Students will identify sources of inspiration and will work towards developing textile designs with consideration to how tools and materials can be effectively repurposed and recycled. As students learn and build upon their previous skills and understanding of the different materials they have available, they will learn new skills and techniques which will allow them to challenge themselves through the creation of increasingly complex products or prototypes. Throughout the year, projects are decided upon in consultation with the classroom teacher. Students typically finish three major projects.

Students are expected to know the following:

- Natural and manufactured textiles, including their origins, characteristics, and care
- Hand and machine construction techniques for producing and/or repairing textile items, including First Peoples textile practices.
- Strategies for altering patterns and upcycling
- Principles of design used in the design of a textile item.
- Environmental and ethical factors that influence textile choices, and the impact of those choices on local and on global communities

Course Fee of \$15

Applied Designs, Skills & Technology - Textiles 11

This course is designed to build upon the skills introduced from Textiles 10. Students will learn information about pattern design and manipulation in the creation of textile items. Students will explore the influence of social media, culture, sustainability and ethics in the design, manufacturing and advertising of fashion products. Consideration will also be given to the

process of up cycling fabrics and garments in order to repurpose existing items using a variety of tools and techniques. Throughout the year, projects are decided upon in consultation with the classroom teacher. Students typically finish three major projects.

Students are expected to know the following:

- Physical and chemical properties of fabrics, including technological developments
- Strategies for modifying patterns
- Techniques for repurposing textile items
- Various factors that affect the selection of textile items, including the elements and principles of design and textile functionality
- Symbolism in textile prints and designs, including those of First Peoples.
- Economical and

ethical issues in textile production and consumption

- Influence of marketing and advertising, such as social media, in the promotion of fashion and textile items.

Course Fee of \$15

Applied Designs, Skills & Technology - Textiles 12

This course will focus on building the skills and techniques learned in textiles 11. Students will create increasingly complex textile items which will allow them to refine and develop their understanding of different fabrics and design principles as well as various methods of garment construction. Consideration will be given to how fabric type and origin relate to end use products and their life cycle. Students will also investigate how different policies and guidelines influence the production and sale of textile items.

Students are expected to know the following:

- Relationship between fibre content, fabric type, and textile use
- Methods for designing patterns
- Textile manipulation techniques
- Legislation, regulations, and agencies that influence production, labeling, and distribution of textile items
- Historical uses of textile items and their influence on modern textile use, including those of First Peoples
- Forecasting practices and how they are used in the development and creation of textile items.

Course Fee of \$15

Applied Designs, Skills & Technology - Foods Studies 9

The aim of Foods Studies 9 is to introduce students to the area of Foods and Nutrition. The course explores multiple units of work and will cover a wide variety of skills, knowledge, and creativity. Students will be given the opportunity to plan, design, create, and evaluate their own recipes.

Fee of \$60.00 for supplementary material

Applied Designs, Skills & Technology - Foods Studies 10

The aim of Foods Studies 10 is to introduce students to the area of Foods and Nutrition. The course explores multiple units of work and will cover a

wide variety of skills, knowledge, and creativity. Students will be given the opportunity to plan, design, create, and evaluate their own recipes.

Fee of \$60.00 for supplementary material

Applied Designs, Skills & Technology

- Foods Studies 11

The aim of Food Studies 11 is to expand on concepts introduced in Food Studies 10. The course explores multiple units of work and will cover a wide variety of skills, knowledge, and creativity. Students will be given the opportunity to plan, design, create, and evaluate their own recipes, and meals while considering the needs of different people.

Fee of \$65.00 for supplementary material

Applied Designs, Skills & Technology

- Foods Studies 12

The aim of Food Studies 12 is to expand on concepts introduced in Food Studies 11. The course explores multiple units of work and will cover a wide variety of skills, knowledge, and creativity. Students will be given the opportunity to plan, design, create, and evaluate their own recipes, and meals while considering the needs of different people.

Fee of \$65.00 for supplementary material

Applied Designs, Skills & Technology - Drafting 9

Come and explore the world of Engineers, Designers, Animators and Architects as we learn to work in a 3D design environment!

In this hands-on course students start by learning the basic techniques of drafting including Orthographic and Isometric drawing. Students then learn how to design using the “Design Process”. Each student will create their very own “Revolutionary New Flashlight”, first sketching, clay modelling, 3D modelling and finally 3D printing a series of prototypes. After students choose and 3D print their final design they will wire the electronics, LED and switch to make it fully functional.

With a computer at every station, emphasis will be placed on CAD (Computer Assisted Design) using AutoSketch, 3-D Rhino6, SketchUp and Chief Architect software.

\$20.00 for supplementary materials

Applied Designs, Skills & Technology - Drafting 10

In this course students continue with the techniques of Drafting 9 with more emphasis on 3-D modelling. A project based learning methodology is used to have students explore the world of Engineering, Industrial Design and Architecture.

Students are introduced to Rhino6, SketchUp & AutoCad2018 and are given a series of Design Challenges. A major project is to design, model and then 3D print the chassis for a fully functional drone. A class set of electronics, motors and controllers are supplied for use in the “Drone Design Challenge”.

There are no prerequisites for this course.

\$20.00 for supplementary materials

Applied Designs, Skills & Technology - Drafting 11

Drafting/ Design Technology 11 is a studio course which concentrates on both architectural design and engineering presentation techniques. The basic “Principles and Elements of Design” are introduced. Emphasis will be placed on CAD (Computer Assisted Design) using AutoCad2018, Chief Architect and 3-D Rhino6. Students are encouraged to explore the use of new technology including multi-media and 3-D imaging. Students will further develop their problem-solving skills and critical thinking skills while working both individually and in small groups. Completion of Drafting 10 would be an asset.

\$25.00 for supplementary materials

Applied Designs, Skills & Technology - Drafting 12

Drafting/Design Technology 12 students will work on more advanced design projects that will include model making and the production of working drawings. Real world applications of design principles are emphasized. This is a studio course where students work on a major project incorporating both design principles and concepts with the use of technology. Students will work exclusively on computers using AutoCad2018, Revit, AC360, Chief Architect and Rhino6. Completion of Drafting 11 would be an asset.

\$25.00 for supplementary materials

Applied Designs, Skills & Technology Woodworking 9

Woodworking 9 is an introduction to the technology of woodworking. Through project construction, students will learn various methods of machine tool use, joinery, and finishing techniques. Students will also be introduced to the process of design as all students will model their projects using 3D CAD on the computer prior to construction. The safe and proper use of woodshop power tools is stressed throughout the course. The

successful completion of Woodworking 9 is recommended prior to woodworking 10.

\$50.00 for supplementary materials

Applied Designs, Skills & Technology - Woodworking 10

Woodworking 10 is intended for students wishing to further their studies in woodworking. This course is suitable for students who have successfully completed Woodworking 9 or for grade 10 students who wish to take Carpentry and Joinery. Skills and techniques learned in Woodworking 9 will be developed with project work. Emphasis on the Design Process will be explored, with all students modelling their projects in 3D CAD prior to construction.

*Guitar building can start during the second half of this course based on student knowledge and experience.

\$60.00* for supplementary materials

*Cost can vary depending on quality and configuration of guitar components.

Applied Designs, Skills & Technology - Woodworking 11

Students will continue to explore the craft of cabinetmaking. Students may take on a self-directed project of their own choosing. In the past several years, many students have shown great interest in guitar building as a project selection. This project is not mandatory and is dependent on student interest and

skill level. Woodworking 10 is not a prerequisite, but is strongly recommended.

\$40.00* for supplementary materials

*Cost can vary depending on the selection of project.

Applied Designs, Skills & Technology - Woodworking 12

Directed studies - Students will choose an emphasis in cabinetmaking, construction, or finishing. The instructor and student come together to plan out the years project(s).

Project and wood selection are determined based on experience and skill.

\$40.00* for supplementary materials

*Cost can vary depending on the selection of project.

Applied Design, Skills & Technology - Electronics, and Robotics 9

Electronics, and Robotics 9 is an introductory course which challenges students to explore various aspects of electronics and robotics in a hands-on fashion. We will investigate the use of tools, materials, and processes with an emphasis on safety and sustainability. Throughout the course students will have the opportunity to design, build, and test a variety of electronic and robotic projects. Some potential projects include an LED blinky and battle bots!

\$30.00 for supplementary materials

Applied Designs, Skills & Technology - Power Technology 9

Power Technology 9 is a course which challenges students to explore various aspects of energy and power generation. In this course, students will learn about small engines, basic metal working skills, and have the opportunity to design projects that converts various forms of energy in a fun, hands-on environment. Some past projects include air boats, 2 and

4-stroke engine repairs, as well as electric motors. Safe work practices and environmental sustainability will be stressed.

\$30.00 for supplementary materials

Applied Designs, Skills & Technology - Technology Exploration 10

Technology Explorations 10 is a course which challenges students to explore various aspects of technology and design in a fun, hands-on fashion. Some of the potential topics include drafting and design, woodwork, metalwork, power technology, and electronics. We will explore the use of tools, materials, and processes with an emphasis on safety. Throughout the course students will design, build, and test solutions to various design challenges. This course is excellent for students considering a career in engineering or any technical related field.

\$30.00 for supplementary materials

Applied Designs, Skills & Technology - Power Technology 10

Power Technology 10 builds on the skills learned in Power Technology 9 however Power Technology is not a prerequisite. In this hands-on based course, students will learn about small engines, basic metal work skills, as well as have the opportunity to design projects that convert various forms of energy. Throughout this course, students will develop problem solving strategies by troubleshooting various power-generation devices. Safe work practices and environment sustainability will be stressed.

\$30.00 for supplementary materials

Applied Designs, Skills & Technology - Engineering 11

Engineering 11 is a course designed to introduce the students to Engineering principles of design and problem solving in a hands-on fashion. The students will have the opportunity to explore various branches of engineering through the design, building, and testing of various projects with an emphasis on sustainability and environmental awareness. Potential topics include workplace safety, precision measurement, technical sketching and drawing, CNC machining, and the application of metalwork, woodwork, and electronics to solve various exciting design challenges!

\$30.00 for supplementary materials

Applied Designs, Skills & Technology - Automotive Technology 11

Automotive Technology 11 teaches students the basic skills needed to understand, maintain, and repair automobiles. This course is not only intended for students thinking about a careers in the automotive trade but teaches everyday life skills that can save a vehicle owner thousands of dollars in costly repairs! To get the most out of this course, students are encouraged to bring in their own cars or family members cars to inspect and service, however shop cars will be provided. This course will also introduce the student to trades such as metal working, fabrication, and welding.

\$30.00 for supplementary materials

Applied Designs, Skills & Technology - Automotive Technology 12

Automotive Technology 12 takes a more in-depth look at the various automotive systems discovered in Automotive Technology 11. It is advised that students take Automotive Technology 11 before enrolling in Auto 12 however it is not a prerequisite. Students are expected to develop proficiency in automotive maintenance and repair. Prescribed labs as well as increased opportunity for self-directed work will be encouraged.

\$30.00 for supplementary materials

Section 18

Advanced Placement

GENERAL PROGRAM DESCRIPTION

Students enrolled in Advanced Placement courses get a feel for the rigors of college/university level studies within the support of a high school environment. Students taking AP courses demonstrate to post-secondary admissions officers that they have sought out an educational experience that will prepare them for success at college/university and beyond.

Each AP course concludes with a college/university level exam developed and scored by post secondary faculty and experienced AP teachers. The exception to these exams is within the Studio Art stream, which requires the submission of a portfolio of their work. The AP organization charges a fee of \$150.00, to be paid by the student, for each exam.

Students who are successful in AP courses are able to enroll directly into the second year course at the post-secondary institution they attend, subject to the policies of that institution.

For more information about Advanced Placement go to:
<http://apcentral.collegeboard.com/home>

AP Courses

AP Computer Science Principles

Students in AP Computer Science Principles will learn about the underlying principles of Computation and IOT (Internet of Things). The course covers a broad range of foundational topics such as programming, algorithms, the internet, big data, digital privacy and security, and the societal impacts of computing. The computer language used will be App Lab (Based on

JavaScript with Text or Block-Based functionality). A directed study course (code.org) with a heavy emphasis on research and peer review.

The course is meant to be the equivalent of a first-semester university or college course in Computer Science. Students taking this course are recommended to complete Computer Information Systems 12 or Computer Programming 12 or have equivalent programming experience with JavaScript or Java. Upon completion of AP Computer Science Principles (and after achieving a score of 4 or 5 on the AP exam) students may be granted credit at some universities.

Optional AP Exam Fee \$150

AP French language

This course is designed to provide an advanced course to students who are willing to accept challenges to exceed their language abilities. The course will develop the four skills of listening, speaking, writing and reading equivalent to a college level course in French language. In the beginning of the year, students will be given the choice to either study a classical French play or create, as a group, their own original play and perform it to their peers as well as to other students from different schools. In March, students will study a classical novel. They will also be exposed to a variety of authentic materials such as textbooks, software, multimedia CD-Rom, Websites, articles from newspapers, as well as the French culture. Upon completion of French 12 AP (and after achieving a score of 4 or 5 on the AP exam), students may be granted credit at some universities (depending on each university's policies).

Optional AP Exam Fee \$150

AP Studio Art: Drawing

The AP Studio Art course is designed for students who are seriously interested in the practical experience of art. AP Studio Art sets a national

standard for performance in the visual arts that contributes to the significant role the arts play in academic environments. The AP Drawing course is designed to address a very broad interpretation of drawing issues and media. Light and shade, line quality, rendering of form, composition, surface manipulation, and illusion of depth are drawing issues that will be addressed through a variety of means, which could include painting, printmaking, mixed media, etc. Abstract and observational works will be expected to demonstrate drawing competence. Students will be expected to complete the AP Drawing portfolio categories of quality, concentration, and breadth. Students are recommended to take Drawing and Painting 11 before this course.

\$50.00 for supplementary materials (including a good quality sketchbook and inkjet ink); \$150 Exam Fee for portfolio evaluation by the Advanced Placement Board in the United States. Students who score highly enough with the AP Board will receive 3 university credits, applicable to post-secondary institutions.

AP 2-D Design Portfolio

The AP Studio Art course is designed for students who are seriously interested in the practical experience of art. AP Studio Art sets a national standard for performance in the visual arts that contributes to the significant role the arts play in academic environments. This course is intended to address two-dimensional (2-D) design issues. Students are asked to demonstrate mastery of 2-D design through many two-dimensional mediums and processes, including, but not limited to, graphic design, digital imaging, photography, collage, fabric design, weaving, illustration, painting, and printmaking. Students will be expected to complete the AP Drawing portfolio categories of quality, concentration, and breadth. Students are recommended to take Graphic Design 11 before this course.

\$50.00 for supplementary materials (including a good quality sketchbook and inkjet ink); \$150 AP Exam Fee for portfolio evaluation by the Advanced Placement Board in the United States. Students who score highly enough with the AP Board will receive 3 university credits, applicable to post-secondary institutions.

AP 3-D Design Portfolio

The AP Studio Art course is designed for students who are seriously interested in the practical experience of art. AP Studio Art sets a national standard for performance in the visual arts that contributes to the significant role the arts play in academic environments. This course is intended to address three-dimensional (3-D) design issues. Students are asked to demonstrate mastery of 3-D design through many three-dimensional mediums and processes. Students will be expected to complete the AP Drawing portfolio categories of quality, concentration, and breadth. Students are recommended to take Ceramics Sculpture 11 before this course.

\$50.00 for supplementary materials (including a good quality sketchbook and inkjet ink); \$150 AP Exam Fee for portfolio evaluation by the Advanced Placement Board in the United States. Students who score highly enough with the AP Board will receive 3 university credits, applicable to post-secondary institutions.

AP Chemistry 12

Topics include reaction kinetics, chemical equilibrium, solubility equilibrium, acid-base chemistry and electrochemistry. It is a fast-paced course, intended for students planning a career in the sciences and engineering fields. Students taking ACHE-12 have the option of writing the AP Chemistry examination in mid May. Upon completion of AP Chemistry 12 (and after achieving a score of 4 or 5 on the AP exam) students may be granted credit at some colleges and universities.

Optional AP Exam Fee \$150

AP Calculus – AB

An advanced placement course in Mathematics consisting of work in Calculus and related topics comparable to courses in colleges and universities. It is expected that students who take AP Calculus will be taking calculus at the university level. Topics covered in this course are similar to the ones in Calculus 12, but are covered more in depth. AP Calculus is intended for students who have already completed the Pre-Calculus 12 course, preferably with a minimum mark of an A.

The AP Calculus - AB examination will be written in early May. Students who are planning on writing the AP Calculus exam in May must be prepared to put in extra time over and above what is assigned in class. Students in AP calculus will receive a school mark for AP Calculus even if they do not write the AP Calculus exam in May however, they cannot use a school mark to be granted a university credit. If they achieve a score of 4 or 5 on the AP exam, students may be granted credit at some colleges and universities.

Optional AP Exam Fee \$150

AP Microeconomics 12

The purpose of the AP course in microeconomics is to give students a thorough understanding of the principles of economics that apply to the functions of individual decision makers, both consumers and producers, within the economic system. It places primary emphasis on the nature and functions of product markets and includes the study of Supply and Demand, Factor Markets, Market Structures, Costs of Production and how the government can intervene to promote greater efficiency and equity in the economy.

Particular emphasis is placed upon building economic theory at the university level in order to create a solid theoretical base for further economic inquiry.

Students will write the AP Exam in May and will receive their Exam mark in the summer. AP Exam Fee \$150
