

# Announcement re: Vaping ... Nov 29th, 2018

There has been a recent increase in the amount of Vaping at Seycove. It has now become a very serious issue which needs to be addressed.

Because of this, a number of steps have been taken to ensure that Seycove is safe for everyone.

1. All student bathrooms, except those on the main floor by the gymnasium and the Gender-Neutral Bathroom by the office, will be locked until further notice.
2. The PE Locker rooms will be locked at all times except at the beginning and end of class for changing.
3. Staff have been asked to restrict the number of students being out of class during class time and monitor the amount of time they are away.
4. Supervision Aides will speak to students who are in the hall during class time and ask them whose class they are supposed to be in.
5. Students who do not have a class scheduled are to go to the library, the cafeteria, or to the DL Centre to work.

Vaping poses significant and immediate health risks for all those who do it. The **bottom line** is that Vaping is having a significant negative impact on our community and our learning environment and it is illegal for all of the students in this building for a reason.

Students are asked to please take the time to educate themselves. Important information has been sent out to all of your parents and teachers.

Be a part of the solution, not a part of the problem, and help us all make Seycove a safer and healthier place.
