

WORK EXPERIENCE *Stories*

Kai at Jastram Engineering

Kai was considering a career in engineering after he graduates, so when he joined Work Experience he wanted a workplace opportunity that would allow him to learn more about the profession.

Kai was placed at Jastram Engineering where he worked on some of the projects they do for the marine industry. Kai enjoyed getting to help assemble some of the complex steering components the business designs and manufactures.

Kai learned through watching and doing. He enjoyed learning to use some of the tools required for the detailed work. He noted how easy the engineers made some of the tasks look and gained huge respect for the skilled work involved in the assembly and design processes.

Kai's experience at Jastram confirmed his desire to pursue engineering and he looks forward to studying it in university next year. He is grateful for all the kind, patient and helpful staff who made his apprenticeship so enjoyable and valuable.

Thank you to Jastram Engineering for reaching out to Seycove Work Experience when we put out a request for business hosts.

If your business is interested in hosting a Work Experience Student, please e-mail [Janice Knapp](#).
