

## **Drafting 11**

**Course Code: MDDF-11**

Drafting 11 is an introductory course intended to introduce students to the world of drafting and design. Students will explore 2D drafting concepts, 3D modeling, and 3D architectural design. Software packages used in this class include AutoCAD, Sketch-Up, and Chief Architect. Typical projects include the design of mechanical objects in 2D and 3D, and interior and exterior house design.
