

## Seycove at sáyəmətən Secondary School

---

### Foundations of Math 12

### Course Code MFOM-12

This course is designed for those students planning on studying the social sciences, humanities or the fine arts programs at the post-secondary level. Topics include financial math, probability, combinatorics, polynomials, exponential, logarithmic & sinusoidal functions, and geometric explorations. Students are assessed by their work on assignments, quizzes and tests.

A finance calculator, preferably a TI83 or TI84 is required for this course. Rental calculators are available. Students should also download the free app, *Desmos Test Mode* on to their personal mobile devices.
