Workplace Math 10

Course Code MWPM-10

Workplace Math 10 is a student-centered course for those who lack confidence in math. Workplace Mathematics 10 is a means of gaining the necessary skills to solve problems and interpret results. Students will develop reasoning, problem solving, communicating and connecting mathematical concepts. Specific topics that may be explored include graphing, 3D shapes, rates of change, trigonometry, metric/imperial conversions, probability and financial literacy.
