Workplace Math 11

Course Code MWPM-11

Workplace Math 11 is a student-centered math option for students who lack confidence in math. As mathematics is increasingly important in our technological society, students require the ability to solve problems, to understand and use mathematics, to interpret the results, and to explain their findings. Workplace Mathematics 11 is a means of gaining these necessary skills. Students will develop reasoning, problem solving, communicating and connecting mathematical concepts. Specific topics that may be explored include graphing, 3D shapes, rates of change, trigonometry, metric/imperial conversions, probability and financial literacy.
