

# Windsor Secondary School

931 Broadview Drive  
North Vancouver B.C.V7H 2E9  
Tel: (604) 903-3700 Fax:(604) 903-3701

At Windsor Secondary School we strive to treat each other with respect and dignity, appreciate diversity, actively pursue lifelong learning through different opportunities and value everyone's right to work and learn in a safe, supportive, challenging environment.

## COURSE OUTLINE

**SUBJECT:** Drafting 10  
(<https://curriculum.gov.bc.ca/curriculum/adst/10/drafting>)

**BIG IDEAS:**

User needs and interests drive the design process.

Social, ethical, and sustainability considerations impact design.

Complex tasks require different technologies and tools at different stages.

**CURRICULAR COMPETENCIES:**

*Students are expected to be able to do the following:*

**Applied Design**

Understanding context

- Engage in a period of research and empathetic observation

Defining

- Identify potential users and relevant contextual factors for a chosen design opportunity
- Identify criteria for success, intended impact, and any constraints
- Determine whether activity is collaborative or self-directed

Ideating

- Take creative risks in generating ideas and add to others' ideas in ways that enhance them
- Screen ideas against criteria and constraints
- Critically analyze and prioritize competing factors to meet community needs for preferred futures
- Maintain an open mind about potentially viable ideas

Prototyping

- Visualize possibilities and develop a plan that includes key stages and resources
- Evaluate a variety of materials for effective use and potential for reuse, recycling, and biodegradability
- Prototype, making changes to tools, materials, and procedures as needed
- Record iterations of prototyping

Testing

- Identify sources of feedback
- Develop an appropriate test
- Conduct the test, collect and compile data, evaluate data, and decide on changes

#### Making

- Identify and use appropriate tools, technologies, materials, and processes
- Make a step-by-step plan and carry it out, making changes as needed
- Use materials in ways that minimize waste

#### Sharing

- Decide on how and with whom to share product and processes
- Demonstrate product to users and critically evaluate its success
- Identify new design goals

### **Applied Skills**

- Demonstrate and document an awareness of precautionary and emergency safety procedures
- Develop competency and proficiency in skills at various levels involving manual dexterity and drafting techniques
- Identify the skills needed, individually or collaboratively, in relation to specific projects, and develop and refine them

### **Applied Technologies**

- Choose, adapt, and if necessary learn more about appropriate tools and technologies to use for tasks
- Evaluate impacts, including unintended negative consequences, of choices made about technology use
- Evaluate the influences of land, natural resources, and culture on the development and use of tools and technologies

### **CONTENT:**

*Students are expected to know the following:*

- design opportunities
- drafting terminology
- drawing standards and conventions
- scales for different types of drawings
- drafting styles, including perspective, mechanical drafting, and architectural drawing
- modelling using computer-aided design (CAD) and computer-aided manufacturing (CAM) software
- coding for creating 3D representations of design solutions
- equipment and tools for manual and computer-aided drafting
