Course Programming

Course Programming

Choosing courses and a program of study is an important process involving students, parents, teachers, administrators and counsellors. After careful consideration, students should base their course requests on their strengths, interests and future needs. Students are asked to list alternative choices on their course request sheets, as their preferred choices may not schedule due to timetable constraints. All course are subject to sufficient enrollment. Students are advised to review course programming information carefully when planning their courses for next year.
