Big Ideas:

- Music is a unique language for creating and communicating
- Music provides opportunities to gain insight into perspectives and experiences of people from a variety of times, places and cultures
- Collaborative music experiences can build community and nurture relationships with others
- Through music making, one's sense of identity and community continually evolves.

Course Description:

All courses in the Choral Music program are performance-based, designed to provide students with a progressive training in vocal performance. This training includes technical aspects of vocal production, basic history and theory as related to the repertoire and guided exploration of different genres of music. The difference between choral groups is based primarily on the difficulty and complexity of repertoire studied with added specialization within specific genres.

The Vocal Jazz Choir is an advanced level ensemble that explores Jazz and popular vocal styles. Advanced skills for both singing and performance are expected. There are positions available for a rhythm section.

Mr. Kozak will expect:

- Full participation from students in terms of a positive attitude, punctual attendance and respectfulness in class and in performance
- Students to be respectful of others and contribute to a supportive learning environment
- Students to come to class with an open mind and a desire to learn.

Students can expect:

- To receive teaching and encouragement regardless of natural ability or musical background
- To be taught the skills and techniques to explore music through small and large ensemble performances.
- To train and perform at a high standard.
- To be taught the correct methods for effective singing and good vocal health
- To have access to resources, extra coaching, and opportunities for personal development.
