

Investing in Education: Capital Projects

The North Vancouver School District's **mandate** is to provide quality educational programs, services, and resources to students. This includes upgrading existing buildings and/or the construction of new and modern facilities, also known as capital projects. The NVSD must contribute partial or full funding for these capital projects, while applying its Guiding Principles to all decision making processes (see North Vancouver School District: Guiding Principles Panel).

The NVSD has completed several capital projects involving school expansions and the replacement of outdated buildings with new, modern, energy efficient schools that are able to accommodate a larger number of students. Since 2004, new and replacement schools, rehabilitations, and upgrades with a combined value of over \$200M have been built:

Lynn Valley Elementary (\$4.5M)

Carson Graham Secondary (\$37M)

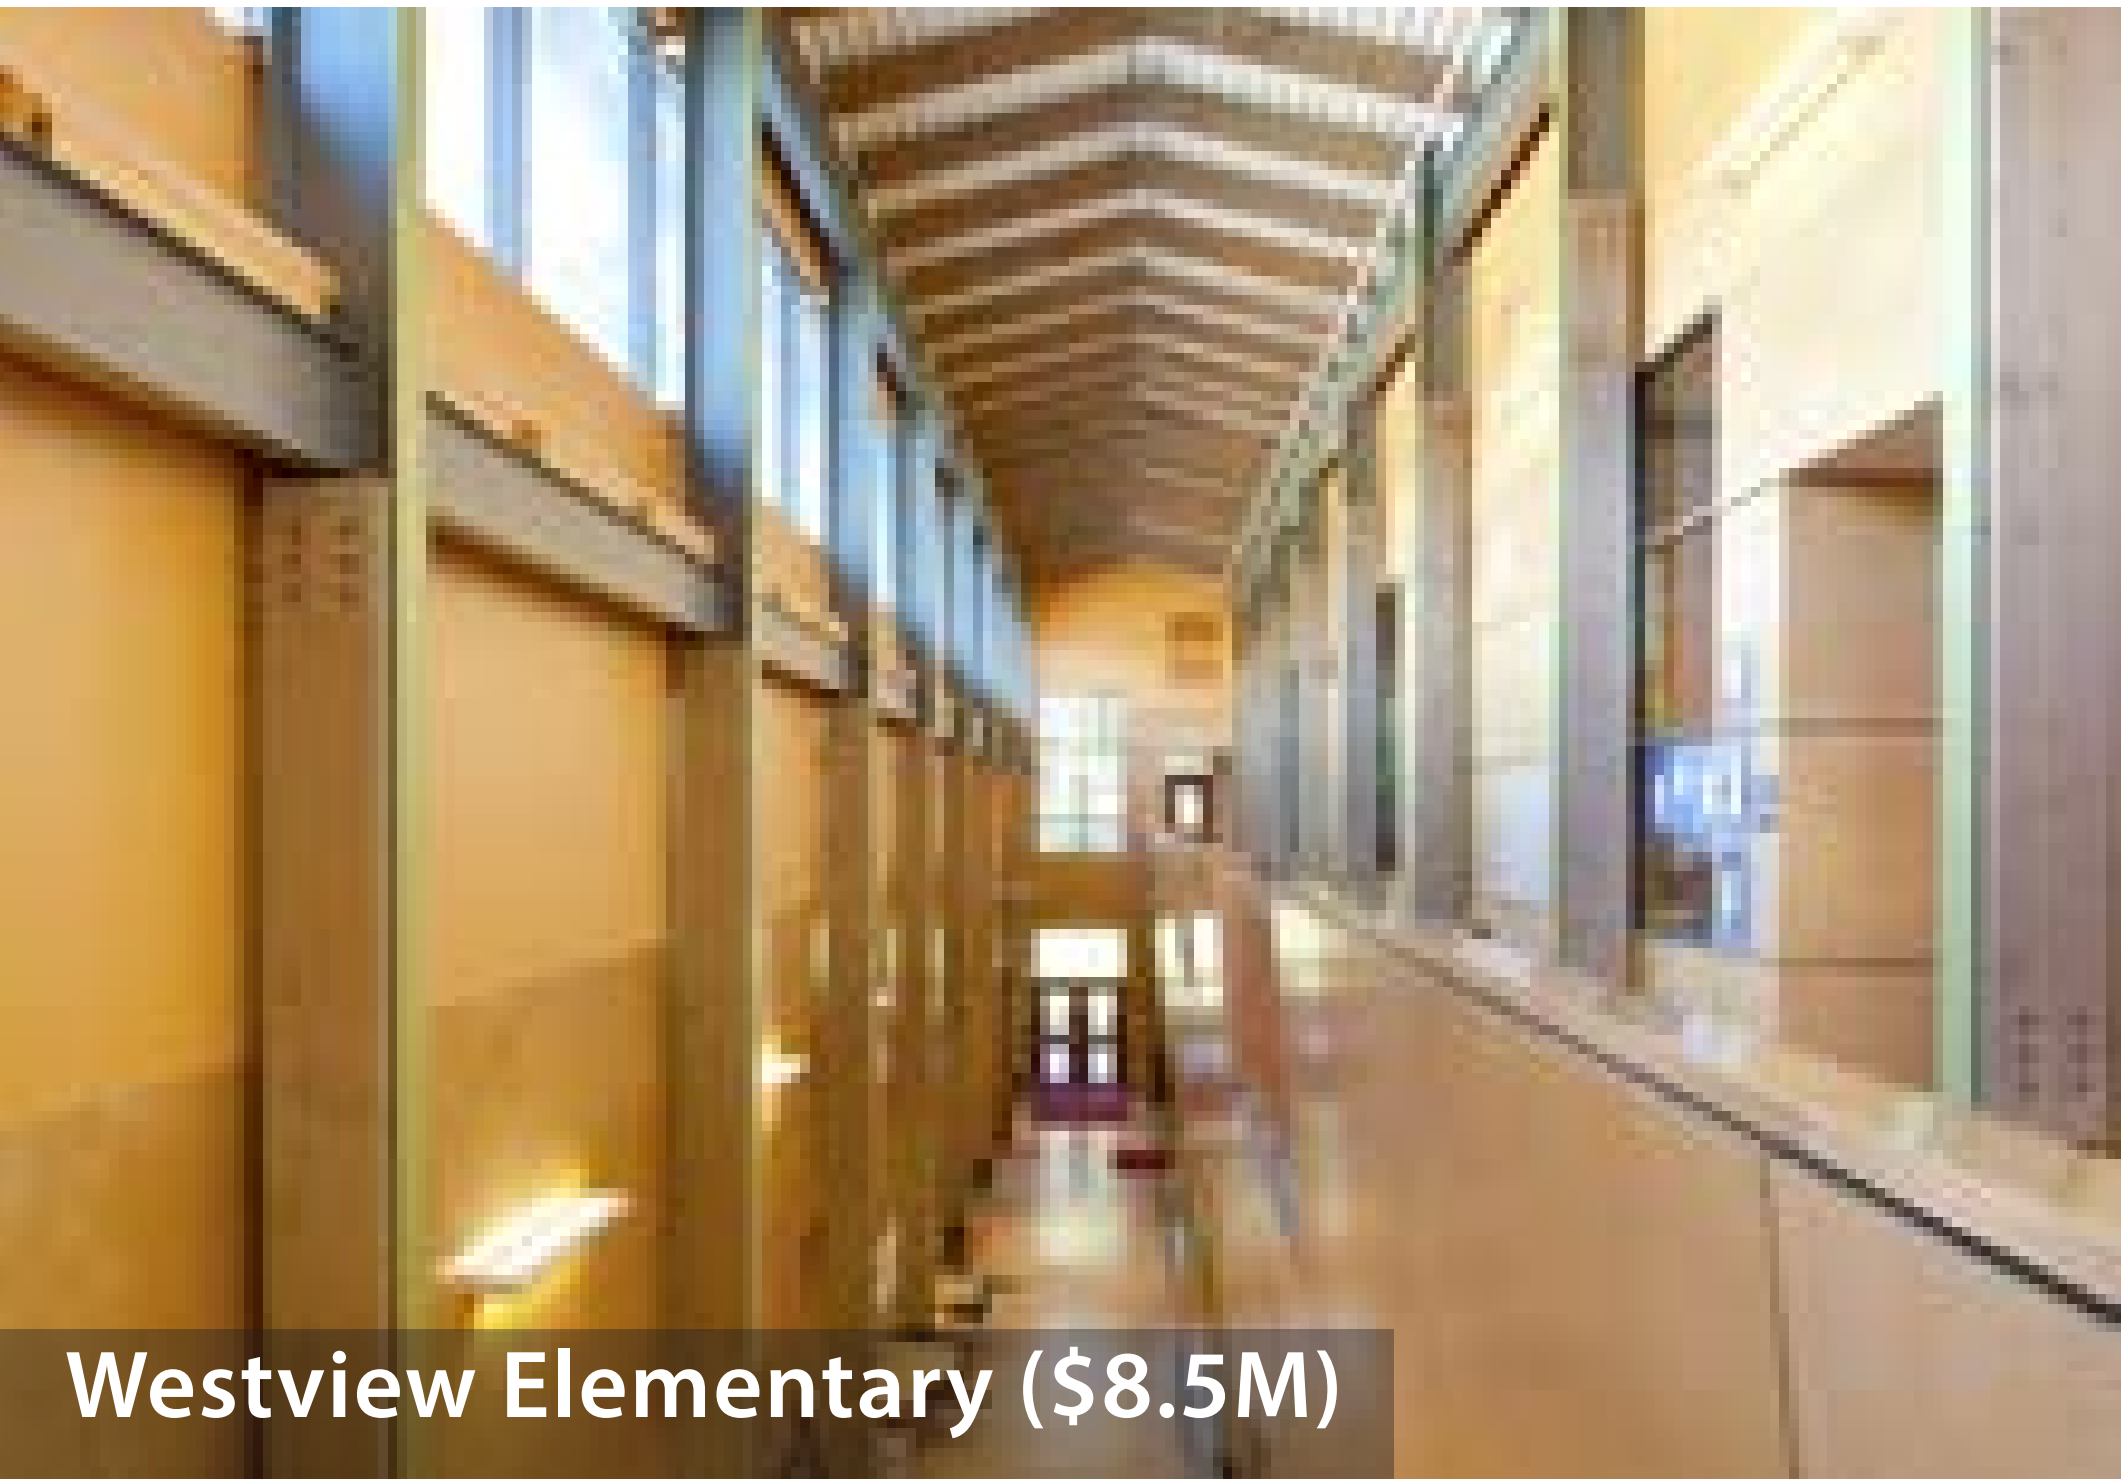

Highlands Elementary (\$13M)

Queen Mary Elementary (\$20M)

Ridgeway Elementary (\$21M)

Westview Elementary (\$8.5M)

Sutherland Secondary (\$29M)

Argyle Secondary (\$9M)

Education Services Centre (\$31M)
