

# Artificial Intelligence in Education

Standing Committee Meeting  
May 7, 2024

# Educational Support for Students and Educators

# Cyber Security

RISK AND IMPACT

**Jason Jackson**

Manager, Information & Communication Technology Infrastructure

**Will Nygard**

ICT Systems & Network Administrator

# Ransomware

## What is it?

- Typically, threat actors encrypt the organization's data and demand a ransom for the decryption key.
- Today, most are "double extortion" attacks that also threaten to leak sensitive information publicly if the ransom is not paid.

# Malware

## Who's the target?

- Malware encounters in the last 30 days  
Live dashboard: [Cyberthreats, viruses, and malware - Microsoft Security Intelligence](#)

# Data Breaches

## Cost of remediation

- Average cost in Canada: US\$5.13 million
- Mean time to identify: 204 days
- Mean time to contain: 73 days

# Data Breaches

## Examples in the Canadian public sector this year

- February 13, 2024 – School District No. 67 (Okanagan Skaha)  
[School District 67 says it may have been breached by a cyberattack - Okanagan | Globalnews.ca](#)
- February 25, 2024 – City of Hamilton  
[Hamilton hit by ransomware attack, city says for 1st time since incident paralyzes services | CBC News](#)
- March 24, 2024 – University of Winnipeg  
[Personal information of thousands, including SINs and bank info, likely exposed in cyberattack: U of Winnipeg | CBC News](#)

# Data Breaches

## What are things like before and after Okanagan College's incident?

- Remediation work isn't easy
- Distrust of the systems
- Lost confidence in leadership

# Lowering the Risk

## Actions that reduce the chance of a data breach

- Mitigate security vulnerabilities
- Replace or remove obsolete systems and equipment
- Enforce Multi-factor Authentication (MFA)
- Educate staff on phishing and other threats

# Lowering the Impact

## Actions that reduce the cost of a data breach

- Data governance
- Offline backups
- Incident response plans
- Monitoring
