

Seycove at sáyəmətən Secondary School

Math 9 Description

Course Code MMA-09

The main goals of all Mathematics courses offered in BC are based on the curricular competencies of:

- Communicating & representing
- Reasoning & modeling
- Understanding & solving
- Connecting and reflecting

Topics may include operations (addition, subtraction, multiplication, division, and order of operations) with rational numbers, exponents and exponent laws, operations with polynomials, two-variable linear relations, multi-step one-variable relations, spatial proportional reasoning, statistics in society, and financial literacy.

A scientific calculator is necessary. The Texas Instrument TI-30X IIS will be enough for most classes your student will take throughout high school.
