Science 8:

Course Code: MSC-08

Science 8 is an exploratory course that is meant to engage learners and get them excited about science! In this course, students are introduced to the scientific cycle of thinking, with which they can make observations about the real world, ask questions, and answer them, using the scientific skills they generate. Students will also practice using different scientific equipment such as microscopes and Bunsen burners. Science 8 will teach students some foundational skills and methods that will prepare them for the rest of their high school science experience!
